## GET A GRIP

**NEW**

## RASANT GRIP

PURE GRIP

**RASANT GRIP** | Play constant and pinpoint strokes even out of inconvenient positions

RASANT GRIP's micro-fine surface structure and its high grip level reveal best spin potential.

Optimized surface design for consistently stable and immediate interlinking of ball and rubber.

Optimize and define the ball-curve by yourself! Explore the limits of physics!

Exhaust the coarse-pored medium sponge and its catapult-effect!

▶ For topspin players of all levels heading for points by modern, multifarious offensive play!

Thickness: 1,7 / 1,9 / 2,1  
112218 red / black

€ 47,95

**NEW**

## RASANT POWERGRIP

MAXIMUM ENERGY TRANSFER

**RASANT POWERGRIP** | Use high-end, play high-end! Play more powerful in pinpointly manner without scatter-losses!

Optimized surface design for consistently stable and immediate interlinking of ball and rubber.

Feel surface and sponge absorbing the ball's energy and the multiple reverse impact.

Maximum catapult without loss of control!

A highly complex rubber composition developed to provide superpower to your strokes!

▶ For demanding, technically skilled middle and high level players with modern spin and counter-spin focus!

Thickness: 1,7 / 1,9 / 2,1  
112219 red / black

RASANT TECH-TALK Video

## THE RASANT RUBBER RANGE: RUBBER TECHNOLOGY ON HIGHEST LEVEL!

With the RASANT technology andro® redefines the power level for speed and spin. Through intensive research for high performance material a unique sponge structure with superior dynamic has been developed.

### RASANT TURBO IDEAL ACCELERATION

**RASANT TURBO** | Discover the possibilities given by the ultra-spinny RASANT top-sheet! React on your opponent's topspins by playing harder and more dangerous counterspins! Carry spin and speed to extremes! Play topspin strokes with an enormous quality and absolute precision! Increase the dynamic of your strokes by using the massive power which is hidden in the unique explosive green RASANT sponge! Use the advantage! Install the update now! Play RASANT TURBO!

► For offensive performers who score by skillful topspins and spinny strokes!

Thickness: 1,7 / 1,9 / 2,1

SPEED LEVEL

DENSITY

€ 47,95

### RASANT POWERSPONGE FANTASTIC GAME EXPERIENCE

**RASANT POWERSPONGE** | Be proactive and play RASANT POWERSPONGE! Experience the fusion of long-lasting delight in playing and huge control provided by the soft sponge's elasticity. Be creative: change between distances and strokes at your discretion! Act outstanding when playing passive and score when playing active! Take advantage of the soft, maximum controlled playing feel caused by the unique green RASANT sponge! It absorbs the energy of the arriving stroke and converts it into your own massive power! Spin, speed and high control – is this your maxim? Then play RASANT POWERSPONGE!

► For creative offensive players who pull out all the stops to score!

Thickness: 1,7 / 1,9 / 2,1  
112217 red / black

# HEXER

## ONE TOP-TECHNOLOGY, FIVE CHARACTERS

### **HEXER HD** HIGH DEFINITION PERFORMANCE

#### HEXER HD

- Excellent energy transfer through innovative sponge-structure!
  - Natural caoutchouc surface - for longer durability!
  - More grip resulting from the surface's new developed micro structure!
  - More speed!
  - More fierceness for your game: The new High Definition Microstructure for more precision and spin!
- ▶ For players who define themselves with Spin, Speed and precise strokes!

Thickness: 1,7 / 1,9 / 2,1  
112208 red / black

€ 44,95

Specific microstructure of the rubber surface for strong rotation

Made in Germany

## HEXER EFFICIENT PERFORMANCE

**HEXER** | Players in search of a rubber for whirling topspins will be enthused by HEXER. The mixture of 100% natural rubber in the upper layer results in increased grip and a longer impact time. This effects in improved trampoline and redation features for the same striking energy (EFFICIENT PERFORMANCE), and provides each topspin with a higher trajectory. In addition, the new and progressive pips geometry puts a compact playing feeling across. The fourth TENSOR generation unfolds its immense qualities in spin and redation oriented play.

▶ For the spin-oriented offensive player!

Thickness: 1,7 / 1,9 / 2,1  
112260 red / black

## HEXER POWERSPONGE SOUND PERFORMANCE

**HEXER POWERSPONGE** | Thanks to this HEXER version also players with preference for soft rubbers and sensational speed glue sound (SOUND PERFORMANCE) can benefit from the advantages of the fourth TENSOR generation. The in-bound rotation energy is absorbed by the rubber and immediately gets transferred to active out-bound energy. The soft POWERSPONGE generously forgives slight mistakes regarding optimum ball hitting area resulting in outstanding control characteristics. The excellent ball feedback provides additional confidence while hitting the ball.

▶ For players of all levels wanting to experience speed and loud sound sensation without missing control!

Thickness: 1,7 / 1,9 / 2,1  
112268 red / black

## HEXER+ PACE PERFORMANCE

**HEXER+** | Are you looking for a rubber whose strength is comfortable ball feedback? Whose speed consistently puts pressure on your opponent and adds unimagined precision to your game? Then go for HEXER+ ! The new recipe of the upper layer combined with the progressive pips geometry gives HEXER+ a strong trampoline effect and a comfortable flat ball rebound angle. Thus the ball can faster make its way to the target - this enables the player to generate more pace while less energy is needed (PACE PERFORMANCE). The HEXER-sponge of the fourth TENSOR-generation provides the dynamics you search for and strokes from all table distances will be routine.

▶ For players whose own versatility is their key to success!

Thickness: 1,7 / 1,9 / 2,1  
112261 red / black

## HEXER DURO LONG-LASTING PERFORMANCE

**HEXER DURO** | HEXER DURO is designed for all players who demand from their rubber strong spin and speed characteristics combined with very good durability. The 100% natural caoutchouc upper layer and the medium-hard sponge in HEXER technology give access to a very broad range of strokes: the sticky upper layer provides a prolonged ball contact time - thus the player leads the ball longer and experiences more control during passive as well as during active strokes. The highly developed endurance enables a later change of rubbers which is comfortable and economic. This has made the HEXER DURO earn the rating LONGLASTING PERFORMANCE.

▶ For players of all levels, who prefer long-lasting rubbers with constant playing characteristics and technical durability.

Thickness: 1,7 / 1,9 / 2,1  
112267 red / black

# HEXER PIPS

## DUAL POWER

Made in Germany

## HEXER PIPS FORCE

**HEXER PIPS FORCE** | FORCE stands synonymically for energy and strength. Providing a high bandwidth for offensive action your opponents will be forced to play just an underpart in the game. The medium sponge, based on the latest HEXER technology, gets across a maximum of control, whereas the typical HEXER PIPS ball jump will lead you to success. The protected 0/90-technology allows you to choose HEXER PIPS FORCE according to your playing system. Lengthwise for more speed and vigour, crosswise for more control when blocking.

▶ For those seeing their own many-sidedness as the key to success!

Thickness: 1,7 / 1,9 / 2,1  
112274 red / black

€ 43,95

## HEXER PIPS+

**HEXER PIPS +** | HEXER PIPS+ is a fourth generation TENSOR rubber providing a very comfortable feeling when you smash and hit which is caused by the soft sponge made of 100% natural rubber and the narrow pimples. Stable feedback for passive strokes with huge power reserves. The very special feature of HEXER PIPS+ is the option to choose between a lengthwise and a crosswise pimple geometry (ECLECTIC PERFORMANCE). Focus on: gentle control or non-stop aggressiveness!

Thickness: 1,7 / 1,9 / 2,1  
112273 red / black

€ 43,95

## HEXER PIPS

**HEXER PIPS** | HEXER rubbers have been well received by many players all over the world. This is why we bundled all the positive "HEXER characteristics" to put it into HEXER PIPS! The first pimple-out rubber by andro® that bases on a fourth generation TENSOR sponge. The rubber mixture of 100% natural rubber serves HEXER PIPS with a high durability and long lasting stability, while the soft sponge keeps speed and control on an exquisite level. Moreover HEXER PIPS is a highlight on the pimple-out rubber segment as it combines two different geometries in one rubber! We call it ECLECTIC PERFORMANCE, as the user can choose between a lengthwise and a crosswise geometry.

Thickness: 1,7 / 1,9 / 2,1  
112272 red / black

€ 43,95

# DUAL POWER

Protected 0/90 technology. andro® rubbers with this imprint have a mold on two differing sides:

Gluing the rubber in the 0° version more speed is generated.

Using the 90° version the control factor gets backed up.

## SHIFTER

**SHIFTER** | andro® SHIFTER - This rubber has what it takes to become a classic! Its very spinny, hard surface and the flexible medium sponge build up the core of this rubber. Excellent spin, control and pleasant speed are the results, when surface and sponge are interacting with each other. Every player type can take advantage of these characteristics - no matter if you prefer a passive playing style or powerful offensive strokes. andro® SHIFTER's unique advantage is the possibility for you to chose between two different ways to assemble the rubber: 0° for more speed, 90° for more spin and control. The sum of these characteristics make andro® SHIFTER a real star among all-round rubbers!!

► For the classical offensive player!

Thickness: 1,3 / 1,5 / 1,7 / 1,9 / 2,1  
112205 red / black

SPEED LEVEL

DENSITY

€ 32,95

## SHIFTER POWERSPONGE

**SHIFTER POWERSPONGE** | andro® SHIFTER POWERSPONGE is the ideal choice for players who put their focus on control. Its soft and elastic sponge provides an excellent service regarding fault tolerance and it makes andro® SHIFTER POWERSPONGE become indispensable for youngsters that are learning new techniques. More experienced players take advantage of the combination of high control and the spinny surface that permits a variable playing style. Furthermore it leads passive as well as offensive strokes to their targets, no matter how difficult they are. Beyond that andro® SHIFTER POWERSPONGE gives you the ultimate choice between two mounting options (0° or 90°).

► For maximum control!

Thickness: 1,5 / 1,7 / 1,9 / 2,1  
112206 red / black

SPEED LEVEL

DENSITY

€ 32,95

# ROXON

## ROCKS ON!

### ROXON 500 PRO

**ROXON 500 PRO** | The top athlete is our most critical customer. Right he is because his level of playing table tennis is so sophisticated that he is also setting high standards for his body and his material. The ROXON 500 PRO is designed for exactly this technically elaborate high-class player. Due to an optimised surface net structure the player can generate utmost stroke dynamic with this rubber. Precision and stability, broad sound and an exercise book flying curve: that these effects can be reached with speed-glue only belongs to the past from now on. ROXON is the future!

► For the absolute top-player!

Thickness: 1,8 / 2,0 / max  
112256 red / black

SPEED LEVEL

DENSITY

€ 41,95

### ROXON 450

**ROXON 450** | The demand for the material is growing with the playing level. With his balanced technical skills the player of the ROXON 450 is able to ideally control this rubber's power and dynamic. The athlete benefits from the reduced rubber weight of the ROXON 450 by faster and more precise arm movements. The stabilisation in the molecular caoutchouc layer results in a high abrasion resistance - long endurance and a shiny surface are the impressive evidence. The rebound effect will inspire all former speed-gluing players also during non-centred hits. The secret lies in the rubber mixture, not in the glue!

► For ambitious players of all playing levels!

Thickness: 1,8 / 2,0 / max  
112255 red / black

SPEED LEVEL

DENSITY

€ 41,95

### ROXON 330

**ROXON 330** | ROXON 330 impressively exposes that the characteristics soft and fast are not contradictions. The established ROXON surface with its extraordinary rubber compound (stabilised caoutchouc tissue) combined with a soft sponge, pointing up the dynamic factor to a new limit. You will immediately recognise the result: An unprecedented precision on all strikes. A more upward flight path, an excellent sound as well as a detailed feeling of the ball are the main ROXON 330 features, leading to a fine control for every player. More power in active play and coincidentally more authority in passive play! This characterises ROXON 330 as a rubber that makes winning for player of all categories easier.

► For maximum sound!

Thickness: 1,8 / 2,0 / max  
112254 red / black

SPEED LEVEL

DENSITY

€ 41,95

Made in Germany

## PLASMA 470

**PLASMA 470** | The most powerful of the three PLASMA rubbers is specifically designed for the top class player. Despite its middle hard sponge the PLASMA 470 provides a soft and controlled playing feeling. During fast topspin strokes it is clearly the PLASMA rubber with the biggest power! The improved rubber mixture provides more consistency of the playing characteristics and extreme abrasion resistance!

► For high-class players.

Thickness: 1,8 / 2,0 / max  
112240 red / black

€ 39,95

## PLASMA 430

**PLASMA 430** | The PLASMA 430 will appeal to every player right from the beginning. The sponge is 5 degree softer compared to the 470. In combination with its high performance upper layer every topspin ball will get an immediate fantastic acceleration. One can feel this from the tremendous trampoline effect – also during slower strokes. The PLASMA 430 is designed for the top athlete as well as for the mid-to lower-class player to whom HITECH rubbers are a great new alternative.

► For players of all levels.

Thickness: 1,8 / 2,0 / max  
112239 red / black

€ 39,95

## PLASMA 380

**PLASMA 380** | The PLASMA 380 will inspire all players searching for an ultra soft and super elastic attacking rubber. The 380 convinces by its extraordinary good control for the ball and it acts extremely mistake forgiving particularly for youth players. The speed level suits lower class players best as they will be able to control the 380 also in difficult situations without a problem.

► For mid and lower class players.

Thickness: 1,6 / 1,8 / 2,0 / max  
112238 red / black

€ 39,95

## REVO FIRE

**REVO FIRE** | Maximum sweet spot + powerful topspin strokes TENSOR - not only more speed, more power and speedgluing sound, but also more spin and more feeling! The exceptional feeling of TENSOR rubbers is core of the REVO FIRE. The sponge absorbs the energy of the appearing ball when the player hits the ball and immediately new energy is released. This effect, responsible for the special feeling, enables every player to have a very good control with the REVO FIRE. The medium adjusted sponge implements accents in active as well as in passive playing situations by demonstrating a brilliant catapult effect. One can play fast and precise topspins and in decisive moments REVO FIRE offers its existing speed reserves in order to directly achieve the winning point.

► Ideal value-for-money for everybody!

Thickness: 1,7 / 1,9 / 2,1  
112262 red / black

€ 36,95

# IMPULS

## FULL IMPULSE!

Made in Germany

## IMPULS POWERSPONGE

**IMPULS POWERSPONGE** | Looking for the complete package of speed, spin and excellent ball-control? Then choose IMPULS POWERSPONGE! By ideal matching of these characteristics you get an easily controllable rubber that provides enormous tempo reserves. A very sticky surface combined with the soft, large-pored sponge of the newest TENSOR-technology, allow easily dirigible strokes and a high degree of control. Your goal to outmaneuver opponents will become child's play. The extreme TENSOR sound will give you additional feedback for a more precise ball-moment.

► For mid and lower class players.

Thickness: 1,8 / 2,0 / 2,2  
112214 red / black

€ 40,95

## IMPULS SPEED

**IMPULS SPEED** | The IMPULS SPEED releases significantly more speed and spin than the successful IMPULS rubber - without losing control! The character of the IMPULS SPEED combines two rubber types: the very soft sponge absorbs the opponent's speed in the passive control play very well. In the active playing modus it enables to more energy. The strong sound and improved ball handling will impress every player immediately. Experience fewer mistakes due to the extra high flying curve and bigger ideal hitting area! The IMPULS SPEED can be managed without effort also when practising less.

► For mid and lower class players.

Thickness: 1,8 / 2,0 / 2,2  
112246 red / black

€ 38,95

## IMPULS

**IMPULS** | IMPULS is manufactured in a modified TENSOR formula and is therefore softer with a higher elasticity than traditional rubbers. It absorbs energy when playing passively and releases energy during active playing. Slice or block or smash, the 30 degree soft sponge provides the right amount of absorption for every speed. When attacking with spin or smashing, this „all-round“ TENSOR construction produces power, resulting in higher ball flight velocity while making the balls fly more precise like a vario-rubber.

► For mid and lower class players.

Thickness: 1,3 / 1,5 / 1,8 / 2,1  
112204 red / black

€ 32,95

## BACKSIDE 2.0 C

**BACKSIDE 2.0 C** | As a defender you are reliant on rubbers with a maximum of feeling and fault tolerance. andro® BACKSIDE 2.0 C offers you exactly these important characteristics! The extremely spinny, almost sticky surface allows precise balls full of rotation that will drive your opponent crazy. You can always count on BACKSIDE 2.0 C, no matter which distance from the table you are forced to return from or which situation you are stuck in. As andro® BACKSIDE 2.0 C is available from 1,1mm on it is the ultimate choice for defenders who set value on rubbers with a lot of control and with a huge range of use.

▶ For the defensive allrounder.

Thickness: 1,1 / 1,3 / 1,5 / 1,7 / 1,9  
112207 red / black

€ 32,95

## BACKSIDE 2.0 D

**BACKSIDE 2.0 D** | andro® BACKSIDE 2.0 D is a rubber which is made for an offensive playing style that is based on control and spin. Effective offensive strokes can be played easily with this rubber which is furnished with a sponge of 40°. The outcome of this is a nice catapult effect which enables you to convert your opponent's bad returns into big points at any time. In 1,3mm or 1,5mm ideal for allround players, from 1,7mm on appropriate for topspin players- thus you are definitely right when you name andro® BACKSIDE 2.0 D a multi-talent.

▶ The Allrounder!

Thickness: 1,3 / 1,5 / 1,7 / 1,9 / 2,1  
112211 red / black

€ 32,95

## ROCKET MEDIUM

**ROCKET MEDIUM** | High quality products are surely always state of the art. andro® ROCKET Medium has reached this high quality level by steadily undergoing tests and development work in which players of all playing levels are involved. With andro® ROCKET MEDIUM a rubber with compact playing feel and precise ball control is available for you. Speed and control are perfectly balanced building up a perfect combination with the high spin potential. The newly developed bonding between sponge and top sheet is on highest standard. andro® ROCKET MEDIUM is a rubber with medium sponge for spin-oriented offensive players.

Thickness: 1,6 / 1,8 / 2,0 / max.  
112223 red / black

€ 26,95

# PIMPLE POWER!

Made in Germany

## BLOWFISH

**BLOWFISH** | Already after short adaptation time, the short pimples of the BLOWFISH are your weapon to set every opponent under pressure. The new type, aggressive pimple design successfully creates topspins as well as effective block and counterattacking strokes. In combination with the innovative TENSOR technology, BLOWFISH thrills by an output of speed, not yet experienced with short pimple rubbers. Furthermore, the feelingly soft sponge causes utmost sensibility, ball contact feedback and control. As a result, your performance is accompanied by a huge variety and is extremely unpredictable for your rival.

► Soft, fast + variable!

Thickness: 1,8 / 2,0 / max  
112264 red / black

SHORT PIMPLES

SPEED LEVEL

DENSITY

€ 36,95

## BLOWFISH+

**BLOWFISH+** | Due to its slightly harder sponge BLOWFISH+ supports the offensive ambitions of the pimple out player efficiently. Based on unusual broad pimples and the medium-size sponge, this type offers an explosiveness that in a jiffy turns every block into an effective shot. Another highlight of this pimple geometry is the extreme stability. It prevents the pips from bending down while the ball is hit thus it enables topspins with good spin. While conventional pimple-out rubbers could only offer these features along with a distinct loss of control the BLOWFISH+ shows strength also in passive playing situations.

► For aggressive attack!

Thickness: 1,8 / 2,0 / max  
112265 red / black

SHORT PIMPLES

## CHAOS

**CHAOS** | TENSOR long pimple - power! The modern defensive player is always focussed to present an impressive „adequate response“ all the time. According to the needs of this player's type, andro® has developed the long pimple rubber CHAOS. The built-in TENSOR technology guarantees the most of safety and backs up the defender in all positions. The ability to create surprisingly slice variations and dangerous, annoying strokes generates andro® CHAOS into an unpredictable top-rubber for every opponent. The version with a thin sponge offers further speed reserves; thus, enabling attacking strokes near the table whenever you want. This modern rubber composition guarantees a lot of joy in playing and often faces the opponent with insoluble problems.

► Unpredictable strokes from every distance.

# LIGNA

## BLADES WITH SOUL

 Handmade in Germany

**NEW**

Origin, water content, storage, processing method and many more aspects have big influence on a blade's playing characteristics. For the in Germany manufactured exclusive andro® LIGNA series only the finest wood, which is also used for manufacturing violins, is processed.

Particular attention is given to the sawing method of the wood veneers: Only the finest sawn veneers are processed for LIGNA woods. Major advantage is that this processing leaves no scar on the veneers behind. Consistently solid and clean cut veneers on both sides form the foundation for an outstanding feel. Wood in the way it should be.

**LIGNA OFF** | This vivid offensive blade convinces with its excellent bounce character. The ball leaving the bat in a high curve is a given, providing aggressive and point oriented strokes even more impact. An inward, around the core veneer placed synthetic fiber provides vigorous effect, without the loss of its core wood character - excellent ball feedback and feelingly attack. andro® LIGNA OFF - for fine spirits among offensive players. Weight approx. 85 g.

10228701 STRAIGHT | 10228702 FLAIR

€ 119,95

**LIGNA OFF+** | The LIGNA OFF+ represents excellent balance between speed, hardness and unique ball feedback. Main factor are the handpicked veneers that forward the impulse without any losses in the momentum of ball-touch. Feelingly, passive strokes are absolutely no problem, which can be used in order to prepare surprising, point-winning offensive actions. andro® LIGNA OFF + for the offensive player. Weight approx. 85 g.

10228801 STRAIGHT | 10228802 FLAIR

€ 129,95

**LIGNA ALL+** | Speaking of control, a table tennis player mostly means the forging character of a blade. The andro® LIGNA ALL+ shows what additional meaning "control" may imply. The perfectly to an allround blade adjusted speed allows to control the opponent and the game. Fast switching from passive to active play poses no problem. Show game overview and use the unique ball feedback to place feelingly and well-balanced strokes. andro® LIGNA ALL+ - for the perfectionists among all-rounders. Weight approx. 85 g.

Compared to other synthetic raw material G-fibre is more flexible and emerged as a real multi talent. It enables hard topspins and winning points as well as backing up the short play over the table by providing enormous feeling. The modern layer succession maximizes the strike zone of the nobly processed blade, whereas the G-fibre is positioned directly behind the outer veneer. The blade for any player looking for a synthetic blade keeping himself grounded. Weight approx. 90 g.

10227001 STRAIGHT | 10227002 FLAIR | 10227003 ANATOMIC € 59,95

**TREIBER Z OFF** | By introducing TREIBER Z andro® completes the TREIBER series by adding a new unique high-class blade with a built-in artificial fiber. Make your own experiences and feel the soft impact harmonizing with the hardness and the stability provided by the Z-fibre. Extraordinary ball-feeling for playing solid and constant blocks or to let off dangerous spin-monsters on your opponent. Best possible balance and special top-heaviness enable you to bring the ball to its target easily. A real multi-talent! Weight approx. 88 g. 10227401 STRAIGHT | 10227402 FLAIR | 10227403 ANATOMIC € 109,95

**TREIBER H OFF** | The high-tech synthetic H-fibre interlayers are positioned directly around the Koto core-veneer. This makes the difference to ordinary synthetic blades. The characteristics of the timber veneer come to the fore resulting enormous ball feeling and control. Especially spin-oriented strokes and the service-return-play take advantage of this. Powerspins from any position become possible and work up your opponents' sweat. An extraordinary blade for extraordinary sensitive players! Weight approx. 90 g.

10227201 STRAIGHT | 10227202 FLAIR | 10227203 ANATOMIC € 69,95

**TREIBER K OFF** | TREIBER K is a high-end blade of the top category. The efficient and top modern K-fibre which is positioned directly under the Koto outer veneer generates dynamic topspin strokes also for not perfectly centric hit balls. Disturbing vibrations through wrongly hit balls are completely absorbed by the K-fibre. What's left is a sensitive impact, never losing its control. The 3 millimeter Koto core-veneer serves as a tempo storage and enables you to push your opponent into the defense in the twinkling of an eye. Weight approx. 90 g.

HANDLE

**OFF+**

**OFF**

**OFF-**

**ALL+**

**OFF+** | The KINETIC RECORD OFF+ evolved from a long tradition of outstanding high speed blades by andro®. Designed for modern and speed focused table tennis this blade never lets you run out of control due to the Kinetic system which is integrated into the handle. The combination of fine plywoods has been tested in several test series and reached remarkable results in terms of speed and control. Furthermore this classy composition, the neat workmanship and the precise bonding of the layers provide a very special playing feel which is usually experienced with blades which are much heavier and thicker. The ideal instrument for players who use to play close to the table and who let the opponent feel the complete measurements of the table by playing precise and hard topspin strokes. Weight approx. 85 g.

10220901 STRAIGHT | 10220902 FLAIR | 10220903 ANATOMIC € 44,95

**OFF** | The andro® product development team created this pure offensive blade exclusively for attackers who force their opponents to mistakes by setting them under constant pressure. A stable and hard center ply forms the core of the andro® KINETIC RECORD OFF. Selected plywoods positioned around the center ply build up the ground for a high ball jump which is an important condition for effective topspin strokes. Sufficient control and precision are guaranteed by the advanced Kinetic system. Fast, with a lot of feeling and absolutely state-of-the-art! Weight approx. 85 g.

10220801 STRAIGHT | 10220802 FLAIR | 10220803 ANATOMIC € 44,95

**OFF-** | Developed for players with highest demands on offensive blades. The Kinetic system supports you with more power through efficient energy transfer during the ball impact. Accurately selected plywoods keep control at its maximum. andro® KINETIC RECORD OFF- is a high quality table tennis blade that supports allround players with offensive tendencies as well as aggressive style players who base their game on strong topspin strokes. Weight approx. 85 g.

10220701 STRAIGHT | 10220702 FLAIR | 10220703 ANATOMIC € 44,95

**ALL+** | High control, a remarkable feeling for the ball and a fascinating feedback in the ball hitting moment - these are the arguments to state the andro® KINETIC RECORD ALL+ an amazing blade. Suitable especially for allround style players who not always hit the ball perfectly centric and need a blade with maximized sweetspot. Control and speed are well balanced which supports you also in offensive situations. Weight approx. 85 g.

10220601 STRAIGHT | 10220602 FLAIR | 10220603 ANATOMIC € 44,95

**KINETIC HANDLE WITH NANO CARBON PELLETS**

**KINETIC**, the yet only dynamic and truly effective system worldwide! When the ball impinges on the bat, carbon balls – the kinetic mass – are moved explosively into the hitting direction. The kinetic mass passes a power impact (1) in the hitting momentum being inverse to the ball (2). This dynamic counteraction neutralizes vibrations and maximizes power, control and ball feeling. The faster the ball, the bigger the effect generated by the counter impact of the kinetic mass.

ARATOX  
**OFF+**

CARBOTOX  
**OFF**

SYNTHETIC  
FIBRE

DIRECT  
IMPACT

MAX.  
SWEET-SPOT

**TRONUM ARATOX** | The user of andro® TRONUM ARATOX has just one simple target: Enforcing the direct point! This blade of the category OFF+ is made for hard and uncompromising strokes. Furthermore the player can take advantage of the excellent feedback which is caused by newly developed synthetic fibre ARATOX. This material enlarges the sweetspot, distributes the energy to the complete blade and therefore increases control during the stroke. The stable and extra high rebound which is typical for blades with synthetic fibres inside brings the fun factor to its maximum. Weight approx. 90 g.

10220101 STRAIGHT | 10220102 FLAIR | 10220103 ANATOMIC € 59,95

**TRONUM CARBOTOX** | The speed of a blade with synthetic fibre inside combined with the feedback of a pure- wooden blade and on top of that maximum feeling. Impossible? Well, andro® TRONUM CARBOTOX makes it possible! The answer to the riddle is the newly developed synthetic fibre CARBOTOX which is installed directly underneath the outer plies. Its special structure and the fact that it is slightly thinner than common synthetic fibres provides this blade with a unique feeling - Difficult speed variations without losing control. A high flying curve lets dreams and effective topspins come true! Weight approx. 90 g.

POWER TRANSFER

Time never stands still for the andro® blade development team. Our developers do research continuously for new and exciting fibers and finest materials. The new Nature Powered Fibre (NPF) Composite is a trend-setting innovative material that bases on a natural fiber which is being produced in an environmentally friendly way. Last but not least the playing characteristics of andro® PRO LOOM and andro® HI LOOM are absolutely convincing:

- ▶ Carbon-like playing characteristics
- ▶ High energy-absorption of the incoming ball
- ▶ Best possible transmission of your own power onto the ball
- ▶ 100% Feedback

**PRO LOOM OFF** | Experience the interplay of the Acacia outer ply and the newly developed NPF Composite. This new and on natural basis produced fiber is positioned directly under the outer ply and supports direct transmission of the hitting impulse straight to the blade's core. Feel the hitting point clearly and enjoy ultimate feeling for the ball! Use your advantage to put your opponent under pressure by playing well placed blocks and radical topspin strokes. The good workmanship leads to a lower error ratio. Let andro® PRO LOOM lift your game to a higher level! Weight approx. 88 g.

10221001 STRAIGHT | 10221002 FLAIR | 10221003 ANATOMIC € 99,95

**HI LOOM OFF** | Every player knows the special feeling where you literally feel that you are tapping the whole potential out of your blade hitting topspin strokes. Sound and feeling give you a perfect feedback when you got the ball exactly in the center of the blade. The topspin curve looks just perfect. With its huge sweet spot andro® HI LOOM integrates this special feeling into your every day table tennis life. The perfect feedback (big advantage when playing passive strokes!), the good workmanship and the energy of the Hinoki outer ply characterize this splendid blade. A quantum jump in the development of high class table tennis blades. Weight approx. 88 g.

10221101 STRAIGHT | 10221102 FLAIR | 10221103 ANATOMIC € 99,95

### NPF COMPOSITE

Ultra light NPF composite inlay for precise feedback and torsion reduction.

# SUPER CORE CELL

ALL IN!

SUPER CORE SYSTEM

FIBRE ENHANCEMENT

360° PROTECTION

MAX. SWEET-SPOT

LOW WEIGHT

**CELL OFF+** | The SUPER CORE CELL OFF+ is a very fast offensive blade, yet it is easy to play with. It requires the player's full commitment to completely activate the blade's speed resources. The CELL OFF+ provides very good elasticity and control with clearly more power in every ball. The strengthened fibres of the 7-layered veneer construction releases energy more efficiently. Also balls that are not hit in the centre will be equipped with sufficient power due to the bigger sweetspot - recommended for a very offensive playing system. Weight approx. 85 g.

10225501 STRAIGHT | 10225502 FLAIR | 10225503 ANATOMIC € 39,95

**CELL CARBON OFF** | By the use of Hi-Tec carbon fibres the andro® product developers could build a blade which conveys a solid stiffness but does not yet feel too hard - ball feeling par excellence! The carbon-nano strings cause an even better sound when hitting the ball. The excellent plywood combination provides much more speed than similar carbon blades so far. This results in more stability, fewer vibrations in the blade and better control. The CARBON OFF is slightly top-heavy with a medium ball flying curve. Players with high technical skills willing to take risks will get enthusiastic! Weight approx. 85 g.

10222101 STRAIGHT | 10222102 FLAIR | 10222103 ANATOMIC € 69,95

The handle's foam chamber is parted into small cells resulting in a more precise absorption of vibration and creating counter-energy for the next stroke. The 360° veneer edge protection prevents from mechanic influences.

**CELL OFF** | The thin outer veneers have a particularly positive impact in this OFF version and create a higher rebound effect. With this blade the player chooses a fantastic composition of speed and control features. The ideal equipment for the variable playing system. The special SUPER CORE CELL feeling and the higher ball bounce allow well-placed strokes also from half-distance. Compared to its predecessor the ball flying curve is significantly higher and therefore the CELL OFF is easy to manage also for players with average practice efforts. The low weight makes it very gentle in terms of arm and wrist exposure. Weight approx. 85 g.

10223301 STRAIGHT | 10223302 FLAIR | 10223303 ANATOMIC € 39,95

**CELL OFF-** | The CELL OFF- combines the power of an offensive blade with the fantastic feeling for the ball known from an allround wood – therefore the ideal choice for many players. Though the OFF- is relatively fast you will never have the feeling of losing control of the ball. This enables to comfortably reliable blocks without the loss of speed especially in the passive play. A change-over to active top spins happens easily because the high base speed reduces work. The innovative small cells within the grip system filled with special foam maximise the feeling for the ball and further help to decrease the error rate for strokes hit under time pressure. The perfect blade for the sportive offensive athlete. Weight approx. 80 g.

10223201 STRAIGHT | 10223202 FLAIR | 10223203 ANATOMIC € 39,95

**CELL ALL+** | With this 7-layer Allround+ blade andro® has created a powerful blade with strengthened fibre layers. The basic idea for this blade's construction was finding a perfect mix of comfortable playing, low mistake level and top technique. Playing the CELL ALL+ every stroke gives the impression of having hit the ball just perfectly in the centre of the blade. The inner veneers are thinner than in the ALL version which results in a very soft feeling. The CELL ALL+ adds more continuity to the play and transmits a feeling of perfect control. The high ball flying curve improves control. Weight approx. 80 g.

10222301 STRAIGHT | 10222302 FLAIR | 10222303 ANATOMIC € 39,95

**CELL ALL** | Who ever tested different allround blades knows that they are not constructed the same at all. Only the exactly correct blade will lead the player to victories. The veneers of the SUPER CORE CELL Allround have been selected in a way that maximises the mistake tolerance also for balls which are not hit precisely. Compared to conventional allround blades the CELL ALL is made of slightly thicker inner veneers and thus it is more robust. The well-balanced weight provides good control also when a player practises less. The wide range of modern stroke variations can easily be learned with this blade. As the high ball flying curve is very forgiving to mistakes it is the ideal equipment for beginners. Weight approx. 80 g.

10222201 STRAIGHT | 10222202 FLAIR | 10222203 ANATOMIC € 39,95

**CS 5 CARBON OFF++** | andro® CS 5 CARBON OFF++ is the ultimate continuation of the CS 5 blade line. Solidly designed, filigree processed and equipped with immense power. Three wooden veneers (Kiri core and Hinoki outer plies) and two carbon layers guarantee that not a single percent of power gets lost. The Hinoki outer ply acts as a catapult which ensures a higher ball curve. The perfect blade for speed-freaks! Weight approx. 88 g.

10224801 STRAIGHT | 10224802 FLAIR | 10224803 ANATOMIC € 69,95

**CS 5 OFF+** | andro® CS 5 OFF+ is a spirited offensive blade that is ideal for modern offensive playing style due to its huge speed reserves. It allows to start sudden and aggressive offensive actions and enables you to enforce speed whenever you want to. Limba and Ayous as intermediate and outer plies are responsible for certain stability supporting variable topspin styles. Highly dynamic while enjoying best ball control and a huge load of fun! Weight approx. 82 g.

10224701 STRAIGHT | 10224702 FLAIR | 10224703 ANATOMIC € 34,95

**CS 5 OFF** | Modern, powerful, excellent feeling – three attributes that describe the andro® CS 5 OFF perfectly. The core consists of 3 mm Kiri which provides the particular feeling. Furthermore andro® CS 5 OFF convinces through constant high control and enormous feeling so that even suboptimal hitting points deliver a good feedback. Lower weight and certain top-heaviness guarantee an easy handling. andro® CS 5 OFF is the first choice for classic offensive players. Weight approx. 82 g.

10224601 STRAIGHT | 10224602 FLAIR | 10224603 ANATOMIC € 34,95

**CS 5 OFF-** | Which features characterize a high quality offensive blade? High control but still enough power to bring on your powerplay. This blade's secret is the intermediate ply made of 1.5 mm thick Awan which is a softer kind of wood. This special plywood provides a very harmonious playing feel and works as a catapult, if you are about to speed up the game. andro® CS 5 OFF- is a stunning blade that surely convinces fans of classic offensive blades. Weight approx. 82 g.

10224501 STRAIGHT | 10224502 FLAIR | 10224503 ANATOMIC € 34,95

**CS 5 ALL+** | Allround blades developed by andro® have an excellent reputation. No doubt andro® CS 5 ALL+ joins this category. The robust centre ply which is quite thick compared to common allround blades provides stability and control. It allows precise blocks as well as hard offensive strokes. The core made of Kiri is covered by one layer each Finesline and Acacia. They provide the special feeling that makes andro® CS 5 ALL+ become such an unique and solid allround blade. Weight approx. 82 g.

# DEF 2.0

## FULL RESISTANCE

Modern defensive game no longer rests upon opponents' mistakes, but is rather premised on available options of a counter-attack and aggressive rotation change.

**PARADE DEF** | There are not many noteworthy defense blades in the table tennis market. The andro® research team has lined up to introduce a further notable blade: andro® PARADE DEF! The thin and utmost fine blade construction enables precise and dreamlike counters against topspin attacks. Handle measures have been worked over and adjusted to a defense player's requirements whilst the blade sheet has a perfect length-width-relation. Through the blade geometry's optimization PARADE DEF provides an enlarged sweetspot and perfect balance. The blade masters opponents' strokes superbly until you get the chance to break away from defense to attacking. In this position the blade provides all its secureness to make your attack a successful one. A real highlight among defensive blades of the modern era! Weight approx. 90 g.

10227301 STRAIGHT | 10227302 FLAIR | 10227303 ANATOMIC € 49,95

**FIBERCOMP DEF** | The magic weapon for defensive players searching for outstanding control! If you combine this 7-layer DEF plywood with long pimple out rubbers you can easily play dangerous stop blocks right behind the net. Further the FIBERCOMP enables you to play "flutter balls" with a high disruption factor. Dependent on the situation it is - specifically due to the blade construction strengthened by two glass fibre veneers - possible to switch immediately to offensive playing. In the defence play this high class plywood technology has an excellent spin reversal. Due to its balsa core the blade is light-weight and provides an ideal ball feedback. The blade design is around 156mm with an extra large sweetspot that minimises the mistake level! Weight approx. 85 g.

# CHAMPS 2014

STÉPHANE OUAICHE AND TOMAS KONECNY

At the National Championships 2014 the 20-year-old Frenchman Stéphane Ouaihe and the 28-year-old Czech Tomas Konecny let their entire competitors behind. Here an exclusive interview with them right after their successes:

**andro®:** "Stéphane and Tomas, congratulations on winning the National Championships. How does this success feel like?"

**Tomas:** "It's fantastic. In the past 3 years I've always reached the semi-finals. Now I finally made it to the finals and won."

**Stéphane:** "Thank you. For me it was very emotional.

I could not believe it at first. Before the event, it has been unimaginable to leave the hall as the new French Champion."

**andro®:** "When was the moment where you realized that you could actually win?"

**Stéphane:** „After the match against Salifou, because it has been a match on highest level against him."

**Tomas:** „When I made the last point in the final, because I've never won against Dima Prokopcov before."

**andro®:** "Which material did you use throughout the event?"

**Tomas:** "I rely on the andro® KINETIC SUPREME

CARBON blade with RASANT and RASANT POWER-SPONGE rubbers."

**Stéphane:** "The andro® TREIBER-Z in combination with RASANT POWERSPONGE rubbers led me to the title."

**andro®:** "When did you actually start playing table tennis?"

**Tomas:** "I was 6 and my grandfather taught it to me first."

**Stéphane:** "Almost 12 years ago when I was 9 years old." Full interview on [www.andro.de/stories](http://www.andro.de/stories)

DÜSSELDORF

## andro® TT-School Borussia Duesseldorf – practice like the Pros since 20 years!

The success story of the andro® table tennis school began with the completion of the TT-Center of Borussia Duesseldorf in 1994. Professional training in a professional environment with professional instructions by licensed coaches - as individual and intensely as possible: Nothing has changed in this ambitious objective to this day. This is achieved primarily through a quantitatively good coach-player ratio. Whether training in the renovated ARAG Center Court, accommodation at the sport hotel Borussia Duesseldorf or the full pension in the dining room of the DTTZ - the 1500 annual participants in the program experience the everyday life of a professional „under one roof“. Multi-ball training, video-analysis with HD camera, ball robots, material consulting, Speedmaster, modern warm-up, interval training, participant T- shirts, tournament prizes - each courses' scope of services is broadly defined and rich in variety.

# ***DRESSROOM***

The andro® microfibre that thinks ahead. The innovative multi-channel structure absorbs and transports humidity faster and even more effective. The smooth textile-pores immediately react to humidity and forward the wet to the outside by its many cross-linked weave-channels. Hereby a maximum of freshness and breathability can be sustained.

IndoorDRY is a functional fabric made from superior polyester fibres developed for the needs of indoor sports. The very breathable polyester fibres transport in the same time up to 50% more humidity away from the skin to the fabric's outside than cotton. This means that sweat evaporates faster. Player's performance capability sustains.

Not only is the functionality pathbreaking, but also the standard for environmental compatibility. Hence andro® only goes for eudermic textiles tested for harmful substances.

Nothing is certain but change - this also applies to table tennis teams. We know that players change teams and teams get new members consistently. In order to present a consistent and cohesive club appearance in the present and into future years andro® will guarantee availability of its collections for years to come. Information relating to exact availability details can be obtained from any specialist andro® dealer.
