### SEASONING

Careful attention is required to guard against drying the wood too rapidly, particularly in wood with thicker dimension. If not dried properly, the non-uniform stresses involved can cause cupping or twisting upon subsequent resawing or working. Once wood has been dried, it is allowed to “rest” in a climate controlled environment for several days to several months.

### GLUE

The use of different glue results in different playing characteristics. Different woods need different glue for best performance. At STIGA we use the best glue and gluing techniques for the best results for each type and combination of wood.

### MADE IN SWEDEN FOR THE WORLD CHAMPIONS

The search for the right blade can be a huge challenge, even for the most experienced players. The best blade for one player is not necessarily the best choice for another, as we each have our own personal touch and style, and we tend to react to blades in different ways.

At STIGA we make this important choice easier by ensuring that every blade is of superior quality, and we make blades with the variety of special playing characteristics demanded by experienced players and coaches.

### WOOD

Our design process begins by considering the playing characteristics of each of the woods we use. Remember that we're talking in general terms here, since each tree, and even each set of wood, is different. Fortunately, here at STIGA we benefit from having played with hundreds of versions of particular models, so we have learned from vast testing and experience how to design the blades “personalities” to perfectly suit the next generation of World Champions.

### CHOOSE THE RIGHT STIGA BLADE

Please observe that this blade table only compares the STIGA blades related to each other. The following characteristics decide the table mentioned beneath. The hardness of the veneers, the blades total weight, the thickness of the blade

### GRIP

**WRB THE WRB SYSTEM** accelerates the blade face for faster returns, more power and extra sensitivity of touch.

**CR THE CR SYSTEM** is when front part of the blade is UV-finished, which yields a reasonably increased speed to the ball.

**CRYSTAL TECHNOLOGY** increase your speed. Normal blade treatments use regular lacquer, but Crystal Technology employs a transparent hydrophilic gel lacquer that STIGA specially developed.

**VPS (The Veneer Precision System)** treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel.

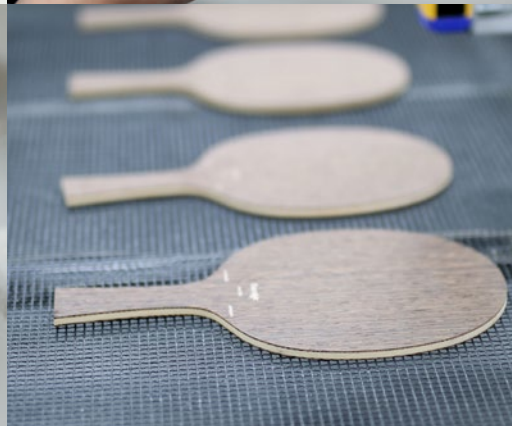

**DIAMOND TOUCH TECHNOLOGY** gives the outer veneers extra hardness and the surface an incredibly smooth finish.

**NCT TECHNOLOGY** blades use our nano technology.

**TEXTREME TECHNOLOGY** a Spread Tow Carbon that increase speed and sweet spot on the blade.

and the different effects of the unique STIGA blade technologies (WRB, CR etc...). Use this blade table as guidance for you to make the right choice of STIGA blades.

# Nostalgic

## SYNONYMOUS WITH HANDMADE QUALITY FROM SWEDEN AND INNOVATIVE THINKING WITH CLASSIC DESIGN.

In 2019, STIGA will celebrate 75 years as a company, and as we look back on our past, especially four years stands out in the history of STIGA. 1944 which was the year STIGA was founded in Sweden, and the other three being 1967, 1976 and 1981. Those were the years when we introduced upon the world the now world-renowned blades Allround Classic, Offensive Classic and Clipper Wood. No other STIGA blades in history have made a bigger impact on the market or sold more copies than these three blades.

Since STIGA was founded in 1944, our own blade production has been the heart and soul of all the Table Tennis equipment we sell. Our philosophy has always been to find the perfect balance between quality, design and playing characteristics.

All throughout our history, we have always valued and respected the environment and rightfully considered wood a living and organic part of nature. This is shown among other things by the fact that we only and always use Eco-Friendly Adhesives and always demands from our wood suppliers that they work closely with the Forest Stewardship Council in order to secure and promote responsible management of the world's forests.

Before we in 2014 revolutionized the Table Tennis carbon blade market by releasing the Carbonado series which uses the top of the line, Swedish made and patented Spread Tow Carbon technology known as TeXtreme Carbon Technology, STIGA was only seen as experts when it comes to all wood blades.

For the Nostalgic series, we have chosen to build each blade using the same brilliant yet simple and timeless middle veneers and thicknesses used in the three STIGA classics. This creates a core feeling and balance quick to recognize and easy to handle.

What's truly unique with these blades are the all-natural Wenge wood used as outer veneer and on the handles. This is the first time in our history, we work with Wenge material as outer veneer, but thanks to the combination of innovative machinery, human proficiency and years of development and testing, we feel comfortable including this material into the long list of high quality woods used in STIGA blades. Thanks to the hard, yet elastic dimensional stability of Wenge wood, the blades get the boost in speed which its predecessors lacked. This creates three, for their each respectively category fast blades with recognizable feeling and balance. The handles also consist of solid Wenge wood, creating a firm and stable feeling in your hand while hitting the ball.

For the lens we have decided for the first time in four decades to move away from the classic STIGA shaped lens. Instead, we present what we call the Nostalgic squircle. A mathematical shaped lens intermediated between a square and a circle, used for the first time in Table Tennis.

The Nostalgic series is handmade quality from Sweden and innovative thinking with classic design, just the way we want to cherish our legacy of building world champions since 1944.

**NOSTALGIC**  
HANDMADE INNOVATION  
OF A CLASSIC

For the Nostalgic series, we have chosen to build each blade using the same brilliant yet simple and timeless middle veneers and thicknesses used in the three STIGA classics. This creates a core feeling and balance quick to recognize and easy to handle.

**NOSTALGIC ALLROUND** NEW

ART. NO. 1057-XX

**77** CONTROL **73** SPEED

ELASTICITY **STIFF** VENEER **5** STYLE **ALL+**

- ▲ Allround 5-ply blade.
- ▲ Developed for the ABS-ball.
- ▲ Made with environment friendly Adhesives.
- ▲ Same hand selected middle veneers as the Allround Classic.
- ▲ Solid handle in hard yet elastic Wenge material.
- ▲ Uniquely designed metal lens.
- ▲ Made for the allround player who's looking or a bit more speed.

**NOSTALGIC OFFENSIVE** NEW

ART. NO. 1037-XX

**65** CONTROL **111** SPEED

ELASTICITY **STIFF** VENEER **5** STYLE **OFF**

- ▲ Offensive 5-ply blade.
- ▲ Developed for the ABS-ball.
- ▲ Made with environment friendly Adhesives.
- ▲ Same hand selected middle veneers as the Offensive Classic.
- ▲ Solid handle in hard yet elastic Wenge material.
- ▲ Uniquely designed metal lens.
- ▲ Made for the offensive player with a lot of feeling.

**NOSTALGIC VII** NEW

ART. NO. 1047-XX

**61** CONTROL **123** SPEED

ELASTICITY **STIFF** VENEER **7** STYLE **OFF**

- ▲ Offensive 7-ply blade.
- ▲ Developed for the ABS-ball.
- ▲ Made with environment friendly Adhesives.
- ▲ Same hand selected middle and second layer veneers as the Clipper Wood.
- ▲ Solid handle in hard yet elastic Wenge material.
- ▲ Uniquely designed metal lens.
- ▲ Made for the hard-hitting power player.

## AZALEA THE BEAUTY OF NATURE

The Azalea blades are influenced by the culture and history of Japanese Table Tennis. Developed in close collaboration with Japanese female players in search for the perfectly balanced Allround and Offensive blade, the focus is on light weight and outstanding feeling and control. Like all STIGA blades, the Azalea Allround is beautifully handcrafted in Sweden, with a smooth top surface with an even softer second layer in order to increase the soft touch needed for controlled and balanced play. The Azalea Offensive is built with a harder second layer compared to the Azalea Allround, which increases the power and speed of the blade.

**AZALEA ALLROUND** NEW  
ART. NO. 1056-XX

**79** CONTROL **72** SPEED

ELASTICITY **FEELING** VENEER 5 STYLE **ALL**

- Lightweight allround 5-ply blade with outstanding feeling and control.
- Soft second layer compared to the Azalea Offensive for a more soft touch.
- Perfect balance between speed, weight and control.
- Developed for the ABS-ball.
- Influenced by Japanese Table Tennis culture.
- Developed in collaboration with Japanese female players.

**AZALEA OFFENSIVE** NEW  
ART. NO. 1036-XX

**76** CONTROL **90** SPEED

ELASTICITY **STIFF** VENEER 5 STYLE **OFF**

- Lightweight offensive 5-ply blade with outstanding feeling and power.
- Increased hardness in the second layer compared to the Azalea Allround.
- Perfect balance between speed, power and feeling.
- Developed for the ABS-ball.
- Influenced by Japanese Table Tennis culture.
- Developed in collaboration with Japanese female players.

## DEFENSIVE PERFECT BALANCE BETWEEN DEFENSE AND ATTACK

Defensive Classic is built with a soft outer veneer and classic defensive characteristics for a familiar feel and approach to the defensive game. The soft outer wood veneers also suppress the ball's impact energy, making it much easier to return your opponent's attacks. This is the ideal weapon for choppers seeking ultimate control in their defensive game. Most defensive players are looking for optimal soft touch combined with exceptional feeling and control, and Defensive Classic is developed to meet those demands. Developed in close collaboration with Masato Shiono, it is made for the classical chopper style of play. The slightly enlarged head of the Defensive Classic in comparison to traditional blades provides the opportunity to create more reversed spin.

### DEFENSIVE CLASSIC

ART. NO. 1015-XX

77 CONTROL 61 SPEED

ELASTICITY FEELING VENEER 5 STYLE DEF

- Lightweight defensive 5-ply blade with outstanding feeling and control.
- Soft outer veneer and classic defensive characteristics.
- Ideal weapon for choppers seeking ultimate control in their defensive game.
- Beautifully designed and handcrafted in Sweden.
- Developed for the ABS-ball.
- Developed in close collaboration with Masato Shiono.
- Slightly enlarged head in comparison to traditional blades.

### DEFENSIVE PRO

ART. NO. 1016-XX

78 CONTROL 73 SPEED

ELASTICITY STIFF VENEER 5+2 STYLE DEF

- Defensive 5+2-ply blade with offensive characteristics yet outstanding control.
- The perfect weapon for modern choppers mixing defensive and offensive strokes.
- Beautifully designed and handcrafted in Sweden.
- Developed for the ABS-ball.
- Developed in close collaboration with Masato Shiono.
- Slightly enlarged head in comparison to traditional blades.
- Two carbon layers for increased sweet spot and stability.

## ZHU YULING

CHINA

**RANK:** WORLD RANKED 2 (APRIL 2018)

ZHU YULING AND CHEN MENG PLAYS WITH CARBONADO 45

CARBONADO SERIES

## CARBONADO SERIES ANOTHER ANGLE OF CARBON

With the Carbonado blades we have taken the carbon blade manufacturing to a new level by using the made in Sweden carbon technology known as TeXtreme®. The blades are built with five layers of wood and two layers of lightweight TeXtreme® Spread Tow Carbon fibers. This unique and patented carbon is the first of its kind and has never before been experienced in Table Tennis.

The special TeXtreme® Spread Tow Carbon is flexible in only one direction, either flexural or torsional, making it possible in the manufacturing process to adjust and improve the ball trajectory and speed to accommodate playing style. The two layers of carbon are applied in a 45 degree angle or a 90 degree angle.

The Carbonado blades offers the player a personalized Sweet Spot. The Carbonado 45, 145 & 245 with its torsional bendability gives a wider Sweet Spot and the Carbonado 90, 190 & 290 and its flexural bendability gives a higher Sweet Spot.

Experience the result of years of research and engineering. Experience the TeXtreme® Carbon feeling!

The new Carbonado 245 and Carbonado 290 blades are constructed with thicker TeXtreme® 200 gram per m² carbon fiber, providing extreme power and carbon feel.

These two new additions to the Carbonado family are built with the same expert processes and quality materials as the original Carbonado 145 and Carbonado 190, with one difference - the Carbonado 245 and 290 contain 200 gram per m² carbon fiber while the original Carbonado 145 and 190 contains 100 gram per m² carbon fiber.

Choose Carbonado 245 and 290 for top quality, expert craftsmanship, and outstanding performance, along with increased hitting power and carbon feeling.

### CHOOSE YOUR SPEED

CARBONADO 45 & 90

64 gram Carbon fiber per m².

CARBONADO 145 & 190

100 gram Carbon fiber per m².

CARBONADO 245 & 290

200 gram Carbon fiber per m².

### CARBONADO 290

ART. NO. 1064-XX

40 CONTROL 154 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 290 is constructed with carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- 200 gram carbon fibre per m<sup>2</sup>.  
A thicker TeXTreme® carbon fibre for increased power and carbon feel.
- High personalized sweet spot.
- Used by Truls Möregårdh.

### CARBONADO 245

ART. NO. 1063-XX

40 CONTROL 152 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 245 is constructed with carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- 200 gram carbon fibre per m<sup>2</sup>.  
A thicker TeXTreme® carbon fibre for increased power and carbon feel.
- Wide personalized sweet spot.

### CARBONADO 190

ART. NO. 1060-XX

44 CONTROL 145 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 190 is constructed with Carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
- High personalized sweet spot.
- 100 gram Carbon fibre per m<sup>2</sup>.

### CARBONADO 145

ART. NO. 1065-XX

44 CONTROL 145 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 145 is constructed with Carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control.
- Wide personalized sweet spot.
- 100 gram Carbon fibre per m<sup>2</sup>.

### CARBONADO 90

ART. NO. 1061-XX

47 CONTROL 140 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 90 is constructed with Carbon layers in a 90 degree angle.
- 90 degree angle provides flexural bendability which gives the blade a stiff feel with great stability and high speed.
- The longer and flatter trajectory makes it an excellent choice for players who want to command the gameplay with high speed strokes.
- High personalized sweet spot.
- 64 gram Carbon fibre per m<sup>2</sup>.

### CARBONADO 45

ART. NO. 1062-XX

47 CONTROL 140 SPEED

ELASTICITY **STIFF** VENEER 5+2 STYLE **OFF+**

- Carbonado 45 is constructed with Carbon layers in a 45 degree angle.
- 45 degree angle provides torsional bendability which gives the blade more flexibility and increased stiffness.
- The high trajectory makes it a perfect choice for the offensive player who looks for good speed and stability combined with excellent control.
- Wide personalized sweet spot.
- 64 gram Carbon fibre per m<sup>2</sup>.
- Used by Zhu Yuling and Chen Meng.

## FAN ZHENDONG

CHINA

**RANK:** WORLD RANKED 1 (APRIL 2018)

**BLADE:** INFINITY VPS V (p. 19)

**BIGGEST ACHIEVEMENTS:**

- TWO TIMES WORLD CHAMPION MEN'S TEAM
- ONE SILVER MEDAL WORLD CHAMPIONSHIPS MEN'S DOUBLES
- ONE BRONZE MEDAL WORLD CHAMPIONSHIPS MEN'S SINGLES
- ONE TIME WORLD CUP CHAMPION
- ONE TIME WORLD CUP RUNNER-UP
- YOUTH OLYMPIC GAMES CHAMPION SINGLES AND MIXED TEAM
- ONE GOLD MEDAL ASIAN CHAMPIONSHIPS MEN'S SINGLES

FAN ZHENDONG PLAYS WITH INFINITY VPS V

VPS SERIES

## VPS SERIES WITH DIAMOND TOUCH

VPS (The Veneer Precision System) treats the veneers with a unique and exact heating and cooling process. This results in a very solid balance and fantastic feel. The Diamond Touch technology gives the outer veneers extra hardness and the surface an incredibly smooth finish.

### ETERNITY VPS V

ART. NO. 3010-XX

66 CONTROL 107 SPEED VPS

ELASTICITY STIFF VENEER 5 STYLE OFF

- Offensive 5-ply blade build to suite today's modern game.
- Special temperature treated middle veneers (VPS) Which reduces vibrations and gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Developed in close collaboration with the Chinese National Team.

### EMERALD VPS V

ART. NO. 1099-XX

63 CONTROL 117 SPEED VPS

ELASTICITY STIFF VENEER 5 STYLE OFF

- Offensive 5-ply blade.
- Green Ebenholz outer veneers with extra hardness.
- Special temperature treated middle veneers (VPS) gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Built to suite today's modern game: aggressive receives and powerful topspin shots.

### INFINITY VPS V

ART. NO. 1618-1005-XX

(ALSO AVAILABLE IN LEGEND AND WINNER GRIP)

70 CONTROL 100 SPEED VPS

ELASTICITY STIFF VENEER 5 STYLE OFF

- Lightweight 5-ply offensive blade.
- Special temperature treated middle veneers (VPS) gives great stability.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.
- Built to suite today's modern game: aggressive receives and powerful topspin shots.
- Used by Fan Zhendong.

## ARCTIC WOOD

### THE BEST OF THE NORTH

Arctic Wood is what you get when you combine nature and science. A blade born in nature and crafted by our knowledge and experience. For this blade we have found a rare pale outer veneer which only grows in the cold and deep forests above the arctic circle. This together with our well-renowned VPS (Veneer Precision System) in the second layer results in a unique blade with characteristics like non-other.

**ARCTIC WOOD**  
ART. NO. 1081-XX

65 CONTROL 110 SPEED VPS

ELASTICITY **STIFF** VENEER 5 STYLE **OFF**

- Stiff offensive 5-ply blade with characteristics like none other.
- Unique pale outer veneer with rustic feeling.
- Special temperature treated middle veneers (VPS) which reduce vibration and give great stability.
- Perfect combination between nature and science.

**ENERGY WRB**  
ART. NO. 2060-XX

74 CONTROL 78 SPEED WRB

ELASTICITY **POWER** VENEER 5 STYLE **ALL+**

- Lightweight 5-ply offensive blade.
- A perfect mix between speed and control that is unique to STIGA.
- A combination that creates optimum feel that all players desire.

## CELERO WOOD

### OFFENSIVE CONTROL

In the Celero Wood we introduce a new harder second layer compared to our previous wood series. This second layer has a very high density which generates more power in offensive strokes. The combination between the high density second layer and the soft surface creates a unique blade with excellent feeling and great hitting power. This blade is perfect for the players with a controlled offensive style of play.

**CELERO WOOD**

ART. NO. 1072-XX  
(ALSO AVAILABLE IN LEGEND AND WINNER GRIP)

74 CONTROL 95 SPEED VPS

ELASTICITY **FEELING** VENEER 5 STYLE **OFF-**

- Controlled offensive 5-ply.
- New harder second layer with high density.
- New combination of high density hard wood and soft surface.
- Surface with extra hardness and smooth finish thanks to the Diamond Touch technology.

**CARBO 7.6 WRB**  
ART. NO. 2041-XX

60 CONTROL 121 SPEED WRB

ELASTICITY **STIFF** VENEER 7+6 STYLE **OFF**

- Offensive blade built with 7 wood and 6 carbon powder layers.
- Fantastic feeling and sound that helps the offensive player to retain the upper hand in fast rallies.
- Very popular among attacking players in Asia.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

**XU XIN**

CHINA

**RANK:** WORLD RANKED 4 (APRIL 2018)**BLADE:** "COMING SOON"**BIGGEST ACHIEVEMENTS:**

XU XIN PLAYS WITH  
"COMING SOON" UNTIL  
RELEASE IN FALL

NCT SERIES

**NCT SERIES**  
BALANCED FORCE

The STIGA NCT blades use modern technologies - it is designed for the era that begins with the ITTF speed glue ban in 2008. In fact, it employs a secret ingredient which testing has shown helps you hit the ball harder and increases the life of the blade. The balance between speed, weight and control is outstanding in the NCT blades. With the NCT you will hit the ball harder without sacrificing control.

**INTENSITY NCT**

ART. NO. 1022-XX

**65** CONTROL **105** SPEED  

ELASTICITY **POWER** VENEER **5** STYLE **OFF**

- 5-ply offensive blade with great feeling and control.
- Great trajectory and speed with an outstanding balance.
- For the controlled attacker.
- The NCT allows you to hit the ball harder without sacrificing any control.

**HYBRID WOOD NCT**

ART. NO. 1039-XX

**52** CONTROL **129** SPEED  

ELASTICITY **STIFF** VENEER **9** STYLE **OFF+**

- Dynamic and very powerful 9-ply blade.
- Designed for the modern attacking game with powerful topspin shots.
- Tremendous control and feel despite the high speed features.
- The NCT allows you to hit the ball harder without sacrificing any control.

**OFFENSIVE WOOD NCT**

ART. NO. 1049-XX

**76** CONTROL **90** SPEED  

ELASTICITY **POWER** VENEER **5** STYLE **OFF-**

- Lightweight 5-ply offensive blade with great feeling and control.
- Based on the lightweight attacking Offensive Classic blade.
- Designed for a technical and fast game with full control.
- The NCT allows you to hit the ball harder without sacrificing any control.

## HARDWOOD SERIES

WHEN NATURE  
MEETS SCIENCE

Hardwood blades balance speed, weight, flexibility and trajectory for an unbeatable formula. These are developed in close cooperation with our top players and the Chinese National Team to meet their demands for the best high-performance blades. Each ply of the Hardwoods are carefully handpicked to ensure the very best wood grain and quality.

**ROSEWOOD XO**  
ART. NO. 1092-XX

62 CONTROL 118 SPEED

ELASTICITY **STIFF** VENEER 5 STYLE **OFF**

- Offensive 5-ply blade for the offensive player who still puts focus on control.
- Built with exclusive, aged and seasoned Rosewood outer veneers.
- A high quality blade that provides outstanding feeling and touch with a smooth sound.
- Rosewood XO provides extra speed and feeling compared to the Rosewood NCT V.

**ROSEWOOD NCT V**  
ART. NO. 1078-XX

63 CONTROL 113 SPEED

ELASTICITY **POWER** VENEER 5 STYLE **OFF**

- Offensive 5-ply blade for the modern attacking game.
- Ideal for the offensive player who demands speed combined with control.
- Exceptional balance of speed, weight, control and trajectory.
- Beautiful hand selected Rosewood veneers of the highest quality.

**ROSEWOOD NCT VII**  
ART. NO. 1088-XX

49 CONTROL 139 SPEED

ELASTICITY **STIFF** VENEER 7 STYLE **OFF+**

- Very offensive 7-ply blade with beautiful Rosewood veneers.
- Maximum stability and feeling on powerful strokes.
- Increased sweet spot thanks to the stability of Rosewood veneers.

**EBENHOLZ NCT V**  
ART. NO. 1079-XX

62 CONTROL 115 SPEED

ELASTICITY **POWER** VENEER 5 STYLE **OFF**

- Offensive 5-ply blade for the modern attacking game.
- A well-balanced state of the art blade, suitable for all playing strategies.
- Beautiful hand selected Ebenholz veneers of the highest quality.

**EBENHOLZ NCT VII**  
ART. NO. 1089-XX

46 CONTROL 141 SPEED

ELASTICITY **STIFF** VENEER 7 STYLE **OFF+**

- Very offensive 7-ply blade.
- Beautiful hand selected Ebenholz veneers of the highest quality.
- Extreme speed and stiffness for the player who want best possible speed and feeling combined.
- Increased sweet spot thanks to the stability of Ebenholz veneers.

## MIU HIRANO

JAPAN

**RANK:** WORLD RANKED 6 (APRIL 2018)

**BLADE:** CLIPPER WOOD (p. 28)

**BIGGEST ACHIEVEMENTS:**

- YOUNGEST WOMEN'S WORLD CUP CHAMPION AND THE FIRST NON-CHINESE PLAYER TO WIN THE TITLE
- ONE TIME WORLD JUNIOR CHAMPION WOMEN'S TEAM
- ONE GOLD MEDAL JAPAN CHAMPIONSHIPS WOMEN'S SINGLES
- FIVE TIMES WORLD TOUR WINNER
- AWARDED ITTF BREAKTHROUGH STAR OF THE YEAR

MIU HIRANO PLAYS WITH CLIPPER WOOD

CR SERIES

## CR SERIES HARD AS A ROCK

The CR (Combi Revolution) System is a revolution in blade technology. The surface of the blade is UV-finished. This yields an increase in speed. A CR System blade is at least 21% faster than a conventional blade.

### CLIPPER CR WRB | CR

ART. NO. 2025-XX | ART. NO. 1025-XX NOT WRB

64 CONTROL 112 SPEED

ELASTICITY NEARLY STIFF VENEER 7 STYLE OFF

- Offensive 7-ply blade.
- The Clipper series is one of the most popular STIGA blade series ever.
- Famous throughout the world among power players for its speed.
- Used by many world class players throughout the years.
- Increased speed compared to the regular Clipper Wood thanks to the CR system.

### OFFENSIVE CR WRB | CR

ART. NO. 2035-XX | ART. NO. 1035-XX NOT WRB

73/74 CONTROL 80/79 SPEED

ELASTICITY POWER VENEER 5 STYLE ALL+

- Lightweight 5-ply blade.
- Built to suite the fast and technical offensive/allround player.
- Increased speed with maintained "STIGA touch" because of the CR system.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

## THE CLASSICS THE MODERNIZED CLASSICS

The Allround Classic and The Offensive Classic is the first blades manufactured by STIGA. It has been used for over 40 years by many world champions. Today we have updated them with Carbon layers resulting in two blades with more speed and power but still as beautiful as their ancestors.

### ALLROUND CLASSIC WRB | ALLROUND CLASSIC

ART. NO. 2050-XX | ART. NO. 1050-XX NOT WRB  
(ALSO AVAILABLE IN LEGEND AND WINNER GRIP)

78/75 CONTROL 63/62 SPEED WRB

ELASTICITY FEELING VENEER 5 STYLE ALL

- Lightweight 5-ply blade with great feeling and control.
- One of the most best-selling allround blades of all time
- Suitable for experienced players as well as beginners.
- The perfect blade for starting your career.
- WRB-system gives faster returns, more power and extra sensitivity of touch.

### OFFENSIVE CLASSIC WRB | OFFENSIVE CLASSIC

ART. NO. 2030-XX | ART. NO. 1030-XX NOT WRB

75/76 CONTROL 77/73 SPEED WRB

ELASTICITY POWER VENEER 5 STYLE ALL+

- Offensive 5-ply blade.
- One of the most best-selling offensive blades of all time.
- Suitable for experienced players as well as beginners.
- The perfect blade for building your career.

### CLIPPER WOOD WRB | CLIPPER WOOD

ART. NO. 2020-XX | ART. NO. 1020-XX NOT WRB

66/68 CONTROL 106/101 SPEED WRB

ELASTICITY NEARLY STIFF VENEER 7 STYLE OFF

- 7-ply offensive blade.
- Famous all over the world for its speed and used by many world class players.
- For players who want extra power behind their strokes.
- Used by Miu Hirano and Liu Guoliang as an active player.
- Developed in close collaboration with the Chinese National Team.
- WRB-system.
- The perfect blade to become a champion with.

### ALLROUND CLASSIC CARBON

ART. NO. 1094-XX

73 CONTROL 78 SPEED WRB

ELASTICITY NEARLY STIFF VENEER 5+2 STYLE ALL+

- Lightweight allround 5-ply blade with two carbon layers.
- An updated version of the world famous Allround Classic blade.
- With two added carbon layers, giving extra power and stability for the modern allround player.
- Designed in the classic STIGA design.

### OFFENSIVE CLASSIC CARBON

ART. NO. 1095-XX

76 CONTROL 92 SPEED WRB

ELASTICITY STIFF VENEER 5+2 STYLE OFF-

- Offensive 5-ply blade with two carbon layers.
- An updated version of the world famous Offensive Classic blade.
- With two added carbon layers, giving extra power and stability for the modern offensive player.
- Designed in the classic STIGA design.

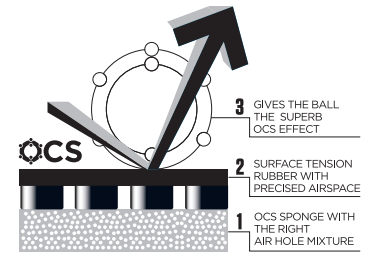

### ALLROUND EVOLUTION

ART. NO. 1051-XX

77 CONTROL 72 SPEED WRB

ELASTICITY FEELING VENEER 5 STYLE ALL

- Lightweight 5-ply allround blade.
- Suitable for the modern allround player with great variation of speed and spin.
- Based on the legendary Allround Classic but slightly faster.
- One of the most popular blades in Japan.

ALL STIGA RUBBERS ARE APPROVED BY ITTF

POLY BALL OPTIMIZED

POLY BALL OPTIMIZED STIGA RUBBER

ABS BALL OPTIMIZED

ABS BALL OPTIMIZED STIGA RUBBER

**ACS-TECHNOLOGY** allows very high speed to be combined with max springiness/elasticity in an ultralight rubber with outstanding control.

**THE SYNERGY TECH** rubber is the combined collaborative efforts of top table tennis chemists from Sweden and Japan.

**BUILT-IN SPEED GLUE EFFECT** when you want to achieve maximum power.

**MEGA TENSION TECHNOLOGY** creates more tension without increasing the weight of the rubber, causing quicker rubber recovery.

**TRANSTENSION SPONGE** and the exciting material, we have found a formula that will revolutionize and generate maximum tension and sponge power.

**THE NCT TECH** rubber use our nano technology, and are designed for the era that begins with the ITTF speed glue ban.

**LONG TRAJECTORY:** We focused on creating a longer trajectory on the ball, as a long trajectory in today's game is more and more important. The combination of spin, speed and long trajectory is unique on STIGA's rubbers; you have never felt this level of play before.

**APS:** The Advanced Pimple Structure with straight shaped pimples makes the rubber adapt to the ball like never before and provides an explosive and spinny rubber that is reliable in every situation.

**OCS:** The brand new Oxygen Capsule System is our most advanced rubber technology, specially adapted to the new poly ball. The OCS-sponge generates a very high amount of catapult effect thanks to the precisely measured size of the air pockets. This technology is developed to generate the maximum amount of speed and spin possible.

**TENSION RUBBER** stands for a truly modern table tennis rubber characterized with a lots of feel, spin variations and intense dynamics.

## THE SPIN OF CLASSIC TABLE TENNIS

STIGA Genesis II Spin is a spin oriented updated version of the original Genesis. Genesis II Spin combines the best of the major table tennis cultures into one rubber. It has a potent synthesis of Japanese/STIGA developed OCS-technology, Swedish knowledge and a new ultra spinny elastic top sheet made in China. The new tacky top sheet is developed specially for the ABS-ball in order to create maximum spin. Genesis II Spin is also sustainably developed to increase the durability and life expectancy of the rubber. The soft sponge gives a high pitch sound and incredible spin and touch.

**GENESIS SERIES**  
 THE BEGINNING IS  
 THE MOST IMPORTANT  
 PART OF THE GAME

The STIGA Genesis combines the best of the major table tennis cultures into one rubber. It has a potent synthesis of Japanese/STIGA developed OCS-technology, Swedish knowledge, and a new spin elastic top sheet made in China. Members of the Chinese and Swedish national teams collaborated to create the ultimate balance between east and west. The new top sheet is sustainably developed to increase the durability and lifetime of the rubber. The Oxygen Capsule System in the sponge generates an intense catapult effect and speed.

- ▲ The medium sponge is suitable for players who desire a rubber with maximum speed.

**SYMMETRY**  
BE AGGRESSIVE  
AND EFFECTIVE

STIGA Symmetry is a made in Japan short pimple rubber developed and adapted for the ABS-ball. The elastic sponge and built-in speed glue effect gives this rubber high speed and excellent spin possibilities. Its new aggressive pimple design creates topspin as well as effective blocks and counterattacking strokes.

## VERTICAL & HORIZONTAL CHOOSE YOUR DIRECTION

STIGA Vertical and Horizontal are our latest long pimple rubbers, developed in close collaboration with former Japanese National Team player Masato Shino. The pimple structure of the Horizontal 20 and Horizontal 55 is placed in a horizontal angle providing more effective spin and a variety in your game. The pimple structure for Vertical 20 and Vertical 55 is placed in a vertical angle providing extra control and stability in your defensive strokes. These rubbers are made in Japan and developed specially for the ABS-ball to increase the spin of the modern defensive game.

## MANTRA SERIES THE PERFECT BALANCE OF SYNTHETIC AND NATURAL RUBBER

STIGA Mantra is developed with the latest Japanese rubber technology and offers the perfect balance of synthetic and natural rubber. Tension between the surface and the sponge resulting in an incredible catapult effect. Microscopic air bubbles in the sponge (Oxygen Capsule System) provide great speed with a stable and consistent hit and touch. This rubber is perfect for players who require the highest in rubber quality and performance.

- Heavy rotation topspin in flicks and offensive returns.
- Truls Möregårdhs choice of rubber.

## AIROC SERIES ASTRONOMICAL AMOUNTS OF SPEED

In Airoc Astro we have multiplied the amount of microscopic air bubbles (Oxygen Capsule System) in the sponge creating more intense catapult effect and speed. The new topsheet works as an energy transfer between the sponge and the ball which provides every stroke with precision and power. Developed together with members of the Chinese National Team to take advantages of the Poly Ball.

86 CONTROL 141 SPEED 128 SPIN

STYLE SPIN ELASTIC SPONGE SOFT

- The adoption of the poly ball changes the game for many seasoned all-around players.
- STIGA Airoc S is designed to expand shot selection and feel for control players.
- Creating a rubber sheet to provide this dynamic range of play is made possible thanks to STIGA's new OCS sponge technology (Oxygen Capsule System).
- We have formulated the air pockets within the sponge to withstand the strongest attacks while providing enough spring to go offensive on demand.
- For the ability to control the tempo and to have multiple ways to score then STIGA Airoc S is your perfect choice.

### AIROC M

ART. NO. 1703-0505-XX RED | ART. NO. 1703-0501-XX BLACK  
SPONGE 1,7 • 1,9 • 2,1

80 CONTROL 149 SPEED 128 SPIN

STYLE SPIN ELASTIC SPONGE MEDIUM

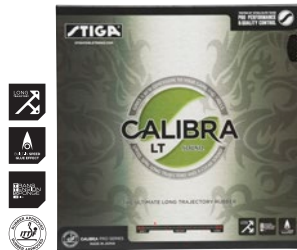

- Research shows the new ITTF tolerances of poly ball impact the ability to create and maintain spin.
- STIGA Airoc M was created to combat this potential powerloss.
- STIGA Airoc M utilizes our newest OCS sponge technology (Oxygen Capsule System) to increase catapult effect without changing the spin ratio. This allows aggressive players to maintain the same spin/speed proportions they have always enjoyed.
- The key to this evolutionary advancement is the delicate balance between the size of the air pockets within the sponge and the elasticity of the top sheet. STIGA's engineers tested many different pip designs and tensions to achieve the perfect rubber for the attacking player.

**CALIBRA LT**

ART. NO. 9825-XX **RED** | ART. NO. 9826-XX **BLACK**  
SPONGE 1,8 | 2,0 | MAX

- Calibra LT has a medium hard sponge suitable for the highly skilled player.
- Revolutionary TransTension Sponge for maximum tension and power.
- Built-in speed glue effect for maximum power.

**CALIBRA LT SOUND**

ART. NO. 9827-XX **RED** | ART. NO. 9828-XX **BLACK**  
SPONGE 1,8 | 2,0 | MAX

- Calibra LT Sound has a soft sponge suitable for all types of offensive play.
- Increased control for blocks and receiving serves.
- A crisp clear sound when striking the ball with built-in speed glue effect.

**CALIBRA LT SPIN**

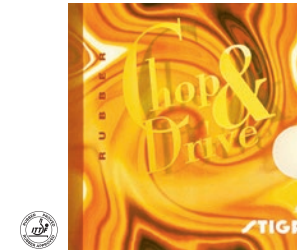

ART. NO. 9868-XX **RED** | ART. NO. 9869-XX **BLACK**  
SPONGE 1,8 | 2,0 | MAX

- Calibra LT Spin has a medium soft sponge recommended for highly trained attackers.
- Outstanding control for touch shots and service returns.
- New possibilities for spin with Long Trajectory technology.

**POWER LT**

ART. NO. 1701-0405-XX **RED**  
ART. NO. 1701-0401-XX **BLACK**  
SPONGE 1,8 | 2,0

- A great choice of rubber for players who want to take the first big step in Table Tennis.

**CHOP & DRIVE**

ART. NO. 9819-XX **RED** | ART. NO. 9820-XX **BLACK**  
SPONGE 1,1 | 1,5 | 1,8

- Very soft sponge absorbs the ball and increases the contact time.
- Produces excessive underspin when required.
- Suits the defensive/allround player.

**COBRA 2000**

ART. NO. 9830-XX **RED** | ART. NO. 9831-XX **BLACK**  
SPONGE 1,5 | 1,8 | 2,0

- Cobra 2000 has a medium sponge with a specially selected rubber mixture.
- It absorbs a lot of your opponent's spin and gives your play more control.
- Perfect rubber for the player learning to create more advanced shots.

**CARBO MC**

ART. NO. 9864-XX **RED** | ART. NO. 9865-XX **BLACK**  
SPONGE 1,8 | 2,0 | MAX

- Uses a medium sponge with great spin
- Designed for club and tournament players looking for a spiny rubber with excellent control.

**BOOST TC**

ART. NO. 9808-XX **RED** | ART. NO. 9809-XX **BLACK**  
SPONGE 1,5 | 1,8 | 2,0

- STIGA Legend Liu Guoliang's weapon of choice as an active player.
- Short pimples rubber combined with a medium sponge.
- Ideal for fast, attacking play near the table.

**ENERGY ABSORBER**

ART. NO. 9812-XX **BLACK**  
SPONGE 1,6 | 2,0

- Energy Absorber is a great anti spin rubber which controls the fiercest of spins.
- Absorbs the opponent's powerful strokes and allows you to block and counter attack.

**CLUB ADVANCE**  
ART. NO. 1215-0715-37

Club Advance – An exceptional racket for the advanced club player ready to reach the top. Distinguish your play with this offensive-minded racket designed by STIGA's leading coaches. If you plan to participate in sanctioned tournaments, this is a superb racket to get your career going. ITTF approved with 2.0 mm red and black Premium rubber to ensure outstanding speed and spin. The Club Advance racket is geared to players that have sound fundamentals and are working on tactics and placement to raise their game to the next level.

**CLUB PERFORMANCE**  
ART. NO. 1214-0715-01

The ultimate in performance for the active club player who desires both offense and control. This racket has been specifically designed by top club trainers around the world for the serious club competitor who isn't ready to, or doesn't wish to, get a custom racket. It is an excellent racket for players still in the early stages of developing their technique and who are benefiting from regular coaching. ITTF approved rubber for tournament play with a flared handle for excellent grip.

### LINER II NEW

ART. NO. 1560-0218-XX WHITE/RED INCL. SHOE BAG

The Liner II is an upgraded version of the original Liner. Made with the same durable flexible polyester fabric that effectively helps keep the foot in the correct position during multi-directional movements and high performance activities.

Liner II also have increased softness and stability in the heel counter and lightweight breathable material on the toe cap and upper parts for extra durability.

- Upper part and toe cap in lightweight breathable material for extra durability.
- Increased softness and durability in the heel counter.
- Natural outsole creates great grip on all floors.
- EVA innersole for maximum comfort.

SIZES AVAILABLE: 36-46

### LINER

ART. NO. 1560-0217-XX **WHITE/SILVER INCL. SHOE BAG**

Shoe Liner is made from a durable flexible polyester fabric that effectively helps keep the foot in the correct position during multi-directional movements and high performance activities. Reinforced sides provide the player with a high level of fit and stability. The upper part of the shoe is constructed with lightweight breathable material, which reduces the buildup of heat and humidity inside the shoe and gives the foot a dryer and cooler environment. Liner allows you full use of your footwork due to the excellent grip provided by natural rubber in the outsole. Constructed using specifically designed flex grooves to improve balance and feel of the ground, Liner uses STIGA's well-renowned soft EVA innersole for maximum comfort.

SIZES AVAILABLE: 36-46

### AGILITY

ART. NO. 1560-0816-XX **BLACK/ORANGE/SILVER**

Agility meets all the requirements for the modern fast table tennis game. This flexible and light shoe enables maximum speed and quickness on every floor surface. Agility allows you full use of your footwork due to excellent floor contact provided by natural rubber in the sole. Reinforced sides and leather fabric offer outstanding stability in both forward and sideways movements. Agility has STIGA's soft EVA innersole for maximum comfort.

SIZES AVAILABLE: 36-46

SIZES AVAILABLE: 39-45

### QUALITY AND SAFETY

With the following items we want to explain our highest demands on quality and safety to you according to which we manufacture our table tennis tables. Each table tennis table that leaves our warehouse is certified by TÜV as per EN 14468-1 and has the „GS“ mark for Tested Safety.

### HIGHEST STABILITY

All our table models have been tested comprehensively for safe stability. Also, in case of unintended high load of the sports equipment, the products withstand at least a weight loading of 80 kg on the outer corners of the table surface and so they absolutely meet the requirements of the standard.

### OPTIMUM MANEUVERABILITY

Because of their stable design and the wheel diameters larger than average our models guarantee optimum maneuverability also on uneven ground. The standard requires a minimum wheel diameter of 75 mm; however, our tables are generally equipped with a wheel diameter of at least 125 mm.

### SAFE LOCKING SYSTEMS

Our table tennis tables are equipped with TÜV- and GS-certified locking devices (e.g. SMS) only that feature easy handling and protect the table tennis table in its playing as well as parking position against unintended folding in and out also when large forces are acting. This prevents accidents in the best possible way. Nonetheless, children should not release the locking device or only release it with the assistance of adults because just the lowering of the table half from the parking position can quickly cause injuries due to its weight.

### ACCESS PROTECTION

For a board distance of more than 110 mm in parking position, the European standard requires protective means that prevent access to this free space to avoid accidents. All our models that are parked with this distance of boards are equipped with access protection.

### MATERIAL THICKNESS AND CONNECTIONS

Highest stability and load ability can only be achieved by the application of stable materials. Therefore, we place importance on the use of pipe diameters and material thicknesses larger than average. Where possible, we use fixed welded components and avoid plastic connections. This makes our table tennis tables highly stable and durable which has already proved to be successful - also under highest loads - in daily use.

### ENDURANCE TEST

Our tournament and show court tables are used world-wide in high-class competitions and league activities and consistently meet the professionals' requirements. We comprehensively exploit these experiences also for the manufacture of leisure table tennis tables. That means the indoor surfaces run through the same high-quality coating plants while using equivalent priming, painting and lacquer coating processes. Before each real start of production, each new table tennis model is completely load tested in compliance with the European standard.

### CHEMICAL SUBSTANCES HAZARDOUS TO HEALTH AND ENVIRONMENT

Our manufacturer get our products and our production processes supervised by independent testing institutes and set great value upon the application of environmentally-friendly methods and materials. We can always prove compliance with regulations referring to the application of chemicals and that we meet the corresponding limit values.

### REQUIREMENTS ON TABLE SURFACE

Our table surfaces are continuously checked for meeting the standard requirements. The most important characteristics of the surfaces include flatness, ball jump, kinetic coefficient of friction, and, in the outdoor area, weather-resistivity. Our outdoor surfaces are weather-resistant as per European standard.

### SAFETY INSTRUCTIONS

All TT tables must have durably visible and clear safety instructions. Our models are equipped with multi-color instructions for the safe use of the table on the under-side of the table. In addition, these labels are treated to be weather-resistant and resistant to UV-radiation.

### QUALITY CLASSES

Depending on the requirements on the TT tables they are classified in different classes as per standard. All our models are divided in four classes, A to D, from high-performance sport to leisure use, and meet the criteria required.

If you have any questions referring to the standard and the individual TT models, please do not hesitate to contact us.

COMPACT STORAGE SYSTEM

COMPACT SYSTEM

SAFETY SYSTEM

#### **COMPACT STORAGE SYSTEM**

Table tennis has always occupied many people within a limited space. Training and competitions often require many tables to be available at the same time. CSS tables make it easier to store large numbers in a small space.

- ▲ The table halves are stored folded into each other, thus reducing drastically the space required.
- ▲ The height of the table is only 155 cm.
- ▲ Each table leaf has its own wheeled base, which means the table is easier to handle.

#### **COMPACT SYSTEM**

The new folding system minimizes the risk of injuries during table storage due to its unique compact design.

#### **NET INCLUDED**

Some of our tables comes with suitable net.

#### **SAFETY BAR**

The Safety Bar will prevent that a child can stay between the table tops.

#### **PATENT SYSTEM FOR UNLOCKING**

By pulling the metal handle, which is connected to a wire, the safety devices will be released and the table can be placed into playing position.

#### **ONLY FOR INDOOR USE**

This table should only be used for indoor playing.

#### **OUTDOOR**

This symbol indicates that the table is approved for outdoor playing.

#### **EN-NORM 14468-1**

CLASS A  
CLASS B  
CLASS C  
CLASS D

#### **INTERNATIONAL MEASUREMENTS FOR PLAYING:**

LENGTH = 274 cm  
WIDTH = 152,5 cm  
HEIGHT = 76 cm

### ELITE ROLLER CSS

ART. NO. 7186-05

A stable and very durable roller table. The CSS construction makes the table ideal for schools, youth clubs and institutions. Perfection in it's design.

25 mm fibreboard.  
EN-Norm: 14468-1 Class:B.  
Packaging in double cartons. Weight: 109 kg.  
Storage size: W = 152,5 cm x D = 66,5 cm x  
H = 154 cm.

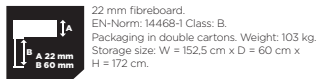

### ELITE ROLLER ADVANCE

ART. NO. 7186-06

The closest you can come to a Pro STIGA table. And it has only 15 minutes of assembly time. Comes with quick cross bars, height adjuster, spacesaving storage possibilities, tabletop connector.

22 mm fibreboard.  
EN-Norm: 14468-1 Class: B.  
Packaging in double cartons. Weight: 103 kg.  
Storage size: W = 152,5 cm x D = 60 cm x  
H = 172 cm.

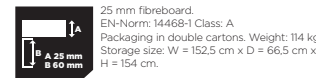

### EXPERT ROLLER CSS

ART. NO. 7190-05

An excellent competition table, with roller trolley. This table is very stable and functional. The legs fold out automatically. It has an extra high density top with excellent bounce characteristics. ITTF approved.

25 mm fibreboard.  
EN-Norm: 14468-1 Class: A  
Packaging in double cartons. Weight: 114 kg.  
Storage size: W = 152,5 cm x D = 66,5 cm x  
H = 154 cm.

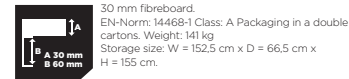

### OPTIMUM 30

ART. NO. 7199-05

The Optimum 30 is a table with a 30 mm thick top. As a consequence, the evenness and consistency of the ball rebound is unparalleled. The top is pretreated multiple times and then coated with a special varnish to give just the right amount of gloss and the ideal frictional coefficient. The result is the truest possible bounce, even when balls are spun at the highest level. ITTF approved.

30 mm fibreboard.  
EN-Norm: 14468-1 Class: A  
Packaging in a double cartons. Weight: 141 kg  
Storage size: W = 152,5 cm x D = 66,5 cm x  
H = 155 cm.

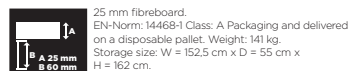

**PREMIUM COMPACT**

ART. NO. 7197-05

The World Class table with the unique and safe Super Compact System. This model is ready assembled for playing. The Premium Compact is ITTF approved.

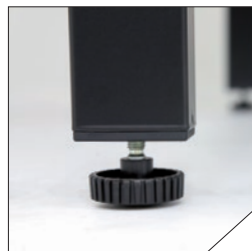

**PREMIUM COMPACT CAN ALSO BE ORDERED AS A WHEELCHAIR FRIENDLY TABLE**

**EXPERT VM**

ART. NO. 7195-05

Expert VM is a World Class table with a 30 mm thick table top. As a consequence, the evenness and consistency of the ball rebound is unparalleled. Two heavy duty wheels are built into every leaf. The Expert VM is ITTF approved.

**9 MM** | ART. NO. 9541-01 **5 M FOR 10 BATS**

**RUBBER PROTECTOR** **NEW**  
STIGA  
ART. NO. 1926-2218-01

Rubber Protector film protects the rubber sheet from air and dust during storage. Contains one sheet and an instruction manual.

**UMPIRE KIT**  
ART. NO. 9520-00 **PLASTIC**

**SCORE BOARD BIG**  
ART. NO. 1905-0113-01 **PLASTIC**

Big score board with a ring system, that makes it easier to turn the leaves over.

**SCORE BOARD SMALL**  
ART. NO. 1904-0113-01 **PLASTIC**

Small score board.

**RULER**  
ART. NO. 1927-2416-10 **100 G**

Ruler for height of net and thickness of rubber. 100 grams.

**UMPIRE TABLE** **NEW**  
ART. NO. 1906-0118-01 **BLACK WITH HANDLE**

Easy to assemble with magnet lock. With a handle for easy carrying.

**TOWEL BOX** **NEW**  
ART. NO. 1901-0113-01

Hard carton. Easy to assemble.

**BALLCATCHER**  
ART. NO. 1920-0414-01 **BLACK/ALUMINUM**

Improved design with a new angle on the basket making the scooping of balls easier. With telescopic pole.

**TIMEOUT WATCH**  
ART. NO. 1924-0915-01 **BLACK**

**UMPIRE COIN**  
ART. NO. 1927-2416-20

**TOWEL HEXAGON**  
 ART. NO. 1903-0217-01 **50X100 CM**  
 ART. NO. 1903-0317-01 **70X140 CM**  
 Black/Grey. 100% Cotton.

**TOWEL ACTIVITY**  
 ART. NO. 1903-0215-04 **NAVY**  
 Cotton 50x100cm.

**TABLE CLEANER** **VOC FREE**

Eslöv AI's international table tennis academy in Eslöv aims to train young talents from all over the world to professional table tennis players. The training is based on a holistic approach - needs are central.

**GUIDANCE:** Trainers, coaches and advisors use the same basic guiding principles to help the players:

Communication - between coaches, players, advisors and parents.  
 Planning - careful planning both long and short term.

Clarity - the objectives, means and methods.

Follow-up - each term, regular monitoring and evaluation of players' development and attainment.

Adjustment - if any changes need to be made they will be do so accordingly.

**OPTIONS:** Each player is offered a training schedule that suits them. Players can study at the high school in various ways. It is possible to come and train for long periods in Eslöv, with sessions tailored to the player's needs, and it is possible to organize short training camps with the same opportunities.

All training camps include personal training, coaching and advice. This is something that players can get access to outside the academy.

We're extremely happy and proud to announce that we will be naming the new arena STIGA Sports Arena in Eskilstuna. Sports and active recreation is something that we at STIGA Sports are very passionate about and the naming of the new fantastic arena is an excellent way for us to contribute to an active sports life and active recreation in Eskilstuna. We're excited about this long term cooperation where we can strengthen both Eskilstunas and STIGA Sports trademark nationally and internationally.

The arena is designed for sports events, concerts, larger conventions and fairs. The main arena holds 3700 seats and is diversifiable for different areas of use. The arena will have a high environmental profile both in design and during events. It will be classified as gold by the Swedish Green Building Council, thanks to it's low energy consumption and the choice of construction material used, which has less impact on the environment.

## BLADES

**ELASTICITY:** The control of the ball is affected when the ball gets in contact with the bat. The elastic properties of a blade make you feel this contact. It depends on the players what type of elasticity he or she likes best. Take these categories into consideration and you will surely find the right blade for you.

**ELASTIC:** Offering low speed with maximum control. Mostly used by the cautious defender.

**FEELING ELASTIC:** The enhanced touch and feel characteristics are a distinct advantage for players who like to be in command of control and accuracy for the allround spin game.

**POWER ELASTIC:** Power elastic blades benefit the spin player a wide variety of attacking styles.

**NEARLY STIFF:** For consistent powerful forehand and backhand top spinning loop play. Nearly stiff blades are ideal for players who want to set the momentum and dictate the play.

**STIFF:** The ultimate selection for the direct power-hitting player who primarily concentrates on pure speed than control.

## RUBBERS

### SPONGE HARDNESS:

**SOFT:** Soft sponges provide a better ball control. The spin remains the same while the speed is slightly reduced. Common among players that what to have a great sound during their game.

**MEDIUM:** Medium sponge is superb for active and powerful players. A well balanced relation between control, speed and spin.

**HARD:** These sponges provide more speed but less control of the ball when striking the ball.

**SURFACE:** The topsheet of the rubber.

**STICKY:** This rubber sheet offers much control and is very sticky, which provides plenty of spin when striking the ball.

**CONTROL ELASTIC:** They develop spin elasticity even at the low speed, and give you more control and more fun. Suitable for control-minded players that want to have the extra touch in their game.

**STICKY ELASTIC:** Slightly sticky rubbers with very good spin dynamics and ball control while playing at a high speed, both away and near the table.

**OFF ELASTIC:** Intelligent mixed between speed and spin dynamic. Off elastic rubbers is for speed players that use a lot of top spin in their game.

**SPIN ELASTIC:** Spin elastic rubbers are for the modern top table tennis. They are as fast as the off elastic rubbers, but have an additional spin component. Very sophisticated technology.

We're proud partners and suppliers to more than 20 national federations and teams.
