Simon Gauzy,
Vice World Champion Team 2024
Bronze Team Olympic Games 2024

spinsight.com/app

Our new generation of NUZN rubbers - developed and optimized with the Spinsight Training App.

NUZN

Every ambitious player, and especially world-class players like Simon Gauzy, is constantly faced with the question of whether switching to a new rubber technology will bring the all-important advantage. Until now, this advantage could not be proven with concrete data. With the new Spinsight analysis tools, we have gone one step further and were able to provide concrete evidence in the development of the NUZN as to which rubber parameters result in measurable advantages for the individual player. This means that, for the first time, we had objective data in addition to the player's subjective feedback.

How does the spin improve in Simon Gauzy's forehand topspin on backspin?

How much speed can the German U19 champion Andre Bertelsmeier generate with his topspin against his opponent's block with NUZN compared to his current rubber?

Spinsight has shown that with NUZN we have developed a rubber generation that enables players to reach new spheres in terms of spin and also speed. For every technically skilled player, NUZN offers the best basis for constant further development and more quality in their strokes. In addition, with the new Spinsight app, every player will be able to document their progress with objective data and fully exploit their potential.

The SPINSIGHT app helps every player to recognize how a change in stroke technique affects the performance of their topspins. Welcome to a new era of rubber technology and training methodology - All Science, No Fiction!

PERFORMANCE**

NUZN TECHNOLOGY

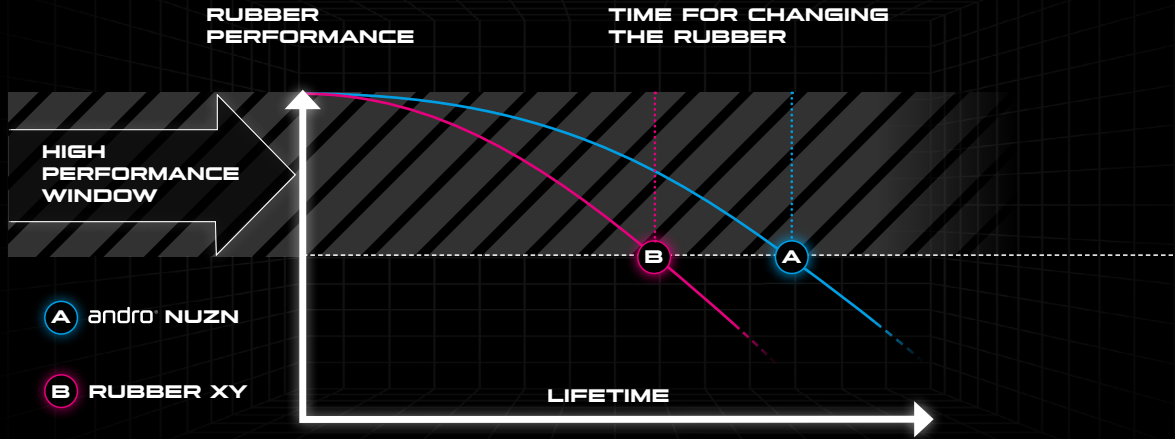

- The Sponge: Optimized energy management at the molecular level brings more power, more consistency and more stability to all your shots.
- Extremely grippy top rubber offers increased optimal hitting window as well as more spin and arc.
- Improved pimple rubber formulation dramatically extends the life of NUZN compared to other rubbers of the same type.

NUZN is thus the first generation of andro table tennis rubbers developed on the basis of scientific data from tests with professional players and Spinsight technology.

Kao Cheng-Jui,
World ranking #21 (03/2025)

EXTENDED DURABILITY

NUZN offers significantly higher durability over comparable spin-oriented high-end rubbers.

PLAYER LEVEL

NUZN 55

- To maximise spin and speed, the NUZN 55 requires the player to have a well-trained technique that enables them to transfer a high level of energy to the ball with perfect timing at the point of impact.
- The player benefits from an enlarged sweetspot, which makes it possible to give the ball maximum spin and arc even under time pressure.
- NUZN 55 gives confidence, because topspins and especially counterspins can be played with unimagined confidence and quality.
- The extremely spinny top sheet and the 55° hard sponge make it possible to reach new performance levels with an unexpectedly long lifetime.
- Developed for a merciless, ultra-modern topspin game.

110.021.102 ●● | Thickness: 2,0 / max

€ 79,95

PLAYER LEVEL

NUZN 50

- The remarkably high dynamics of the NUZN 50 are activated by technically clean strokes. The sponge compensates for minor deviations in the point of impact with its moderate hardness.
- Topspins are given a high and aggressive trajectory by the extremely spinny top sheet, while the sponge contributes consistency.
- Short spin strokes close to the table, typical of modern table tennis, gain in quality and arc.
- NUZN 50 enables dangerous and safe counter-spins as well as smooth transitions from passive to active play.
- The top sheet and the 50° hard sponge make it possible to reach new performance levels with an unimaginably long lifetime.
- Developed for a precise, ultra-modern topspin game.

ADVANCED HYBRID PERFORMANCE

STICKYNESS

DENSITY

- A slightly sticky top rubber combined with a balanced tensor sponge.
- The best of both worlds: Enormous grip with high dynamics and a unique TENSOR feel.

HYBRID PERFORMANCE

High performance for everyone ready to take their game to the next level!

With the NUZN series, andro has ushered in a new era of table tennis rubbers – developed using scientific data and cutting-edge technology for maximum performance. Top-level performance doesn't have to be reserved for professionals!

andro NUZN 45 and NUZN 48 bring the groundbreaking features of NUZN technology into a form that offers ambitious players the perfect balance of power, control, and spin. They adopt the proven concept of a grippy surface and innovative hybrid sponge technology, but in a finely tuned version that allows for greater consistency and precision.

Whether you're looking to make your attacking play more versatile or add more confidence and spin to your topspin shots – NUZN 45 and NUZN 48 are your ideal companions on the journey to a more dynamic and effective playing style. Experience the best of both worlds and feel how NUZN technology can sustainably elevate your game!

PLAYER LEVEL

NUZN 48

- We have developed the NUZN 48 for ambitious players who want to take their game to the next level with the groundbreaking NUZN technology without compromising on precision and control.
- Advanced Hybrid Performance - a slightly sticky top rubber combined with an extremely lively TENSOR sponge.
- Experience the best of both worlds: The slightly sticky topsheet ensures optimum grip, while the proven NUZN pimple geometry is responsible for an explosive flight curve.
- The improved surface durability ensures consistently stable playing characteristics.

110.021.107 ●● | Thickness: 1,9 / 2,1

€ 59,95

PLAYER LEVEL

NUZN 45

- With the NUZN 45, we have succeeded in transferring the features of the ground-breaking NUZN technology to a precisely controllable rubber for ambitious players - away from the top level.
- Advanced Hybrid Performance - a slightly sticky top rubber combined with a controlled, finely balanced TENSOR sponge.
- Experience the best of both worlds: Maximum grip combined with high dynamics and the unique Tensor feel.
- Take advantage of NUZN technology to give your system more rotation, consistency and precision.
- The improved surface durability ensures consistently stable playing characteristics.

RASANTER

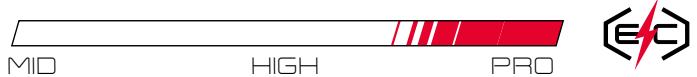

FOR THE PERFECT COUNTERSPIN

It is the most crucial table tennis stroke of the present: the counterspin. It is the answer to the opening spin, faster and more dangerous than a block - and often a direct winner or at least a massive advantage in the rest of the rally. Do you also want to optimize the stroke that will make the difference in the future? Then you better stay tuned now. andro Rasanter C are the world's first table tennis rubbers specifically designed for counterspin. To cushion the incoming topspin in a controlled manner and to extend the ball contact time, the pimple design of the Rasanter C offers an integrated damper. This Counterspin Damper neutralises the topspin and enables controlled counter-rotation with an aggressive trajectory and the incomparable dynamics that only an Energy Cell sponge can deliver. This interaction of the counterspin design and the new upper rubber formula also opens up new options in the serve and return game. Serve with higher quality and return the ball more variable and precise.

Made in Germany

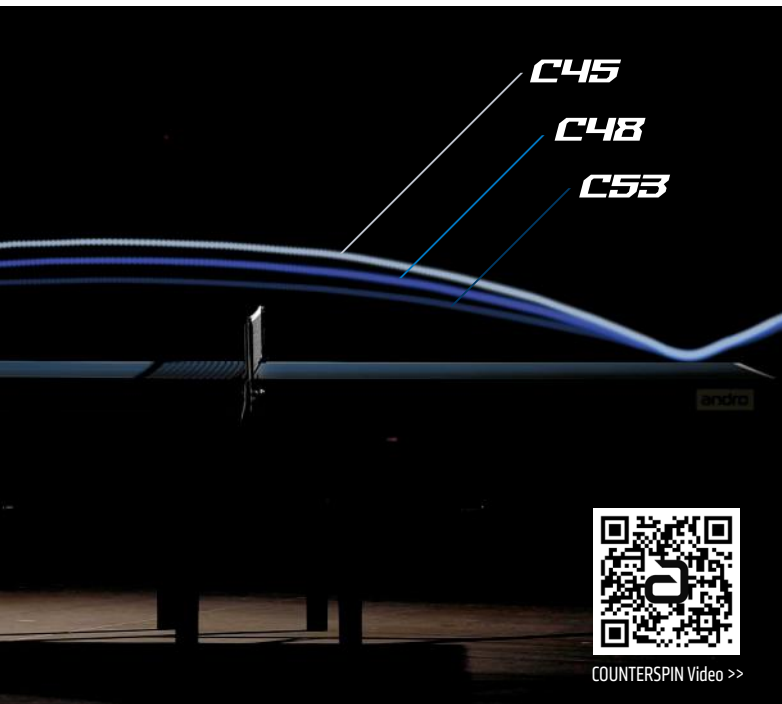

RASANTER C53

- You dominate the game over the table and take every chance to score with a spin or counterspin.
- Break with conventions, use the strengths of the ENERGY CELL technology: more power and quality in your strokes, high dynamics and longer ball contact feel.
- The ENERGY CELL sponge with its highly elastic cell structure ensures an extremely dynamic energy transfer for all topspin variations.
- The 53° hard sponge sets the tone in open rallies: power, stability, precision.
- With the newly developed C geometry you gain control over your opponent's spin with help of the Counterspin Damper.

110.021.099 ●● | Stärken: 2,0 / ultramax

€ 64,95

COUNTERSPIN: ONE TECHNOLOGY, THREE TRAJECTORIES

Three degrees of hardness of the ENERGY CELL sponge allow you to strengthen other facets of your game besides the counterspin:

- C53 with harder designed sponge for more power and stability – produces shallower and more direct flight curves.
- C48 with a higher catapult and softer stroke that compensates for slight inaccuracies in the game – produces balanced flight curves.
- C45 with maximum control and sound - produces high arc even with lower arm acceleration.

POWERED BY  ENERGY CELL

RASANTER C48

- You rely on the highest quality in serve and return, persistently pressuring your opponent with spins and counterspins.
- Break with conventions, use the strengths of the ENERGY CELL technology: more power and quality in your strokes, high dynamics and longer ball contact feel.
- The ENERGY CELL sponge with its highly elastic cell structure ensures an extremely dynamic energy transfer for all topspin variations.
- Use the catapult and the above-average optimal hitting zone of the 48° hard sponge to add extra persistency to your game.
- With the newly developed C geometry you gain control over your opponent's spin with help of the Counterspin Damper.

110.021.098 ●● | Thickness: 2,0 / ultramax
€ 64,95

RASANTER C45

- Playing safe and winding counterspins, that is your system. You dictate the game with incredibly safe spins and a varied game over the table.
- Break with conventions, use the strengths of the ENERGY CELL technology: more power and quality in your strokes, high dynamics and longer ball contact feel.
- The ENERGY CELL sponge with its highly elastic cell structure ensures an extremely dynamic energy transfer for all topspin variations.
- The medium sponge of 45° allows counterspins and topspins on backspin even with moderate arm acceleration.
- With the newly developed C geometry you gain control over your opponent's spin with help of the Counterspin Damper.

PERFORMANCE
RUBBERS

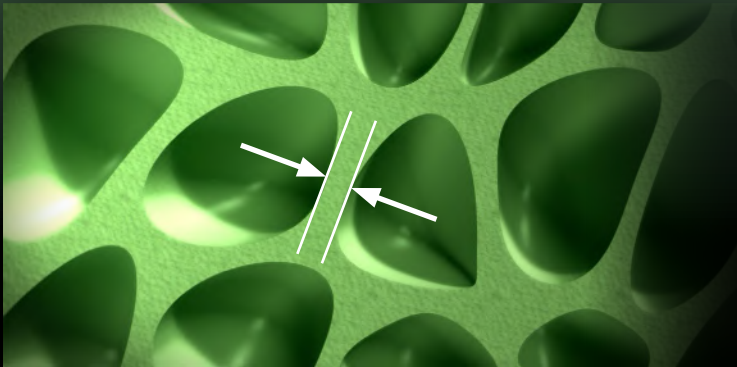

RASANTER ENERGY CELL

3 ENERGY CELL VARIANTS

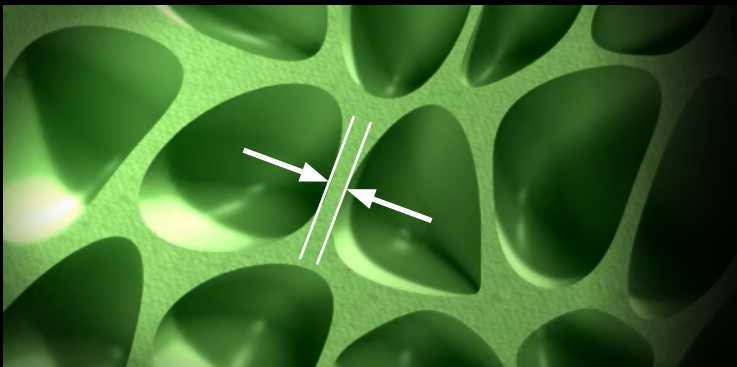

All sponge variants consist of the special ENERGY CELL material. Each of the three sponges undergoes its own specific thermal treatment - resulting in a specific cell structure for each one of the 3 variants.

The ENERGY CELL sponge is the engine for all Rasanter EC rubbers. Each single cell works like a powerful compressor. The cell properties are multiplied in the entire network and result in the incomparable RASANTER ENERGY CELL performance.

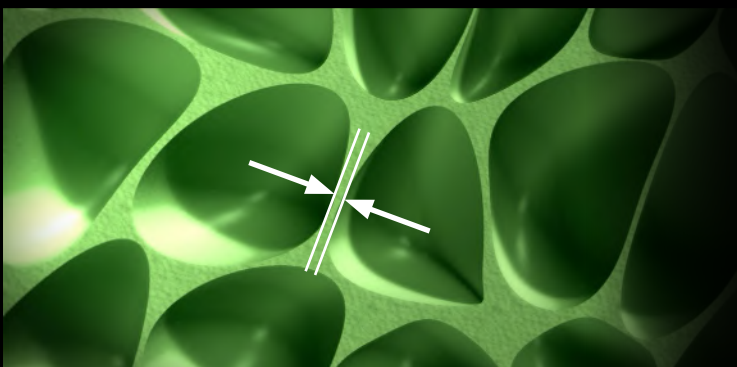

R53
RASANTER

- strong cell-walls, sponge hardness 53°
- maximum ball acceleration and maximum rotation
- for aggressive top level players

R48
RASANTER

- medium hard cell-walls, sponge hardness 48°
- precision and control meet maximum rotation
- for spin-oriented advanced players

R45
RASANTER

- thin cell-walls, sponge hardness 45°
- maximum precision and control meet maximum rotation
- for spin-oriented all-round players

 Made in Germany

RASANTER R53

- Your game is powered by maximum spin and high dynamics. You want the point. By all means.
- Use the strengths of the andro ENERGY CELL technology: more power with hard topspins and game openings on backspin, high dynamics and longer ball contact feel.
- The andro ENERGY CELL sponge with highly elastic cell structure ensures an extremely dynamic energy transfer, especially for fast and hard topspins.
- The 53° sponge provides immediate feedback on ideal ball contact. You will be surprised how soft 53° can feel like.
- The R rubber surface for maximum rotation gains additively more impact through the ENERGY CELL sponge.

110.021.092 ●●● | Thickness: 1,7 / 2,0 / ultramax
● | Thickness: 2,0 / ultramax

€ 62,95

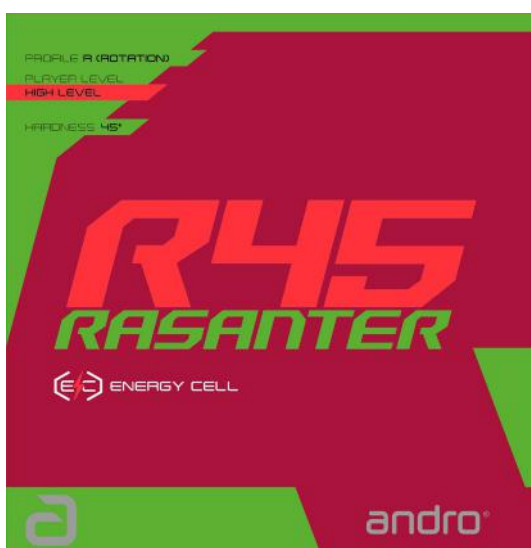

RASANTER R48

- Your game is loaded with spin and speed. You force the point by your powerful, persistent topspin game.
- Break with conventions, use the strengths of the ENERGY CELL technology: more power and quality in your strokes, high dynamics and longer ball contact feel.
- The ENERGY CELL sponge with its highly elastic cell structure ensures an extremely dynamic energy transfer for all topspin variations.
- Team up with the 48° sponge and its above-average optimal sweet spot.
- The R rubber surface for maximum rotation gains additional impact by the ENERGY CELL sponge.

110.021.080 ●●●● | Thickness: 1,7 / 2,0 / ultramax

€ 62,95

RASANTER R45

- Your game is spin and speed. Variability and safeness embody your topspins.
- Break with conventions, use the strengths of the ENERGY CELL technology: more power and quality in your strokes, high dynamics – longer ball contact feel.
- The ENERGY CELL sponge with its highly elastic cell structure ensures an extremely dynamic energy transfer to all topspin variations.
- The 45° medium sponge supports both active and passive strokes in the best possible way. Perfect balance of spin, speed and control as the basis for variable offensive table tennis.
- The R surface for maximum rotation gains an additional impact by the ENERGY CELL sponge.

110.021.093 ●●● | Thickness: 1,7 / 2,0 / ultramax

€ 62,95

**PERFORMANCE
RUBBERS**

RASANTER

VELOCITY AND ROTATION

ULTRAMAX

With the sponge thickness **ULTRAMAX**, RASANTER enters new dimensions. With a thickness of 2.3 mm the sponge is the thickest modern TENSOR sponge so far, made in Germany. By reducing the thickness of the rubber surface, additional volume is provided and paves the way for huge rebound power. This is the ultimate answer to the loss of speed by the 40+ ball!

- + Denser cell structure creates power and compact, direct feel
- + Smaller pores allow weight savings as less adhesive is needed for assembly
- + **ULTRAMAX** = more sponge = more power

V-SERIES

V stands for velocity, i.e. for the upper rubber with maximum speed performance. The narrower, more widely spaced pimples maximize the catapult effect.

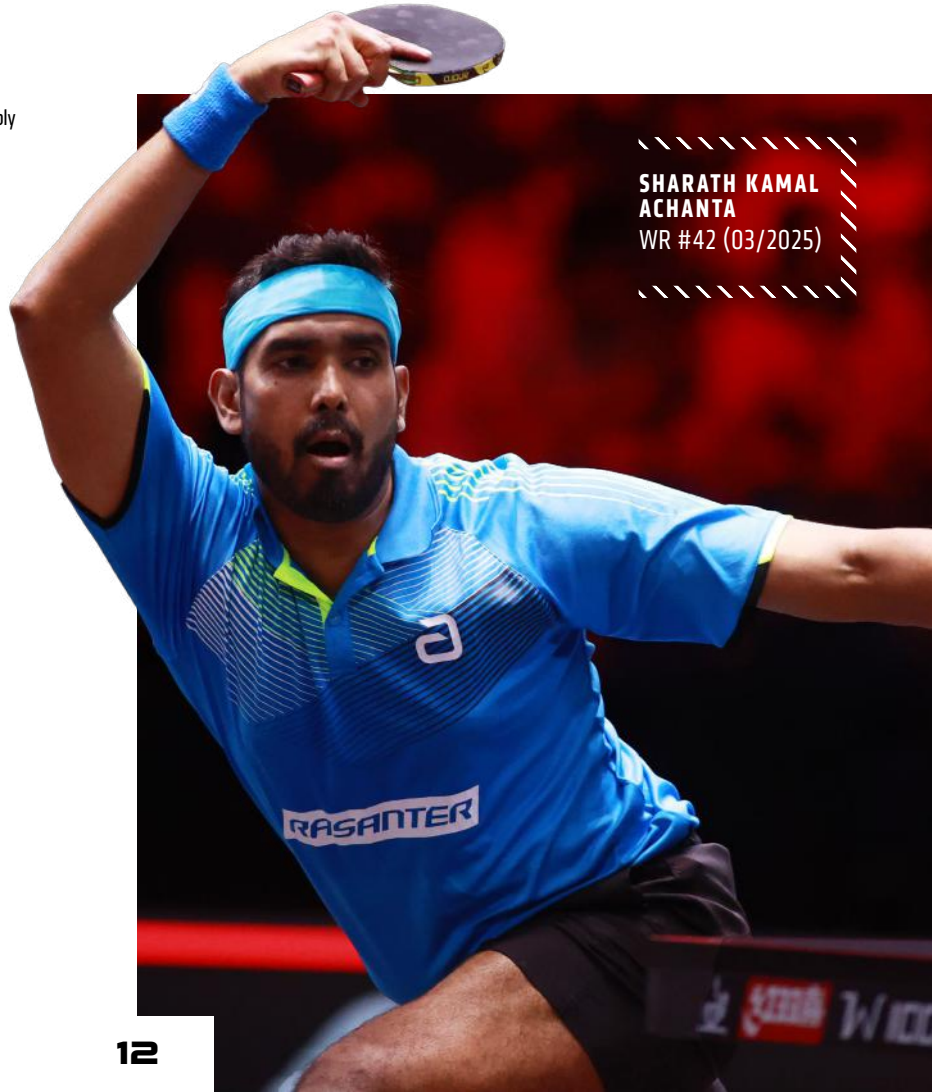

R-SERIES

R stands for rotation, i.e. for the upper rubber with maximum spin performance. Thicker, closely spaced pimples maximize the contact area with the ball.

THE RASANTER CONCEPT

All RASANTER family rubbers are based on the same top technology, but cover a wide range with finely graduated degrees of hardness in terms of control. The goal is that ambitious players of differing technical levels can benefit from the RASANTER technology. In particular, the RASANTER versions with lower degrees of hardness are an enrichment for players of all classes due to the high performance potential.

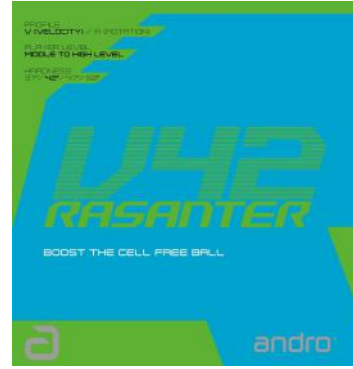

**SHARATH KAMAL
ACHANTA**
WR #42 (03/2025)

RASANTER V47

- Your profile is speed driven. You go for flat and direct strokes.
- As a high to pro level player you take control of the 47° sponge for unlimited power and energy.
- Your configuration will be the ultimate speed weapon performing short and fast top spins. Offensive with no compromises. Don't tell us we have not warned you.

110.021.091 ●● | Thickness: 2,0 / Ultramax € 54,95

RASANTER V42

- Your profile is speed driven. You score flat, fast and without any detour.
- As a mid to high level player you will benefit from the medium 42° sponge compensating smaller sweet spot inaccuracies of your stroke.
- Be confident and take the risk of fast strokes accounting for the modern offensive semi-distance play!

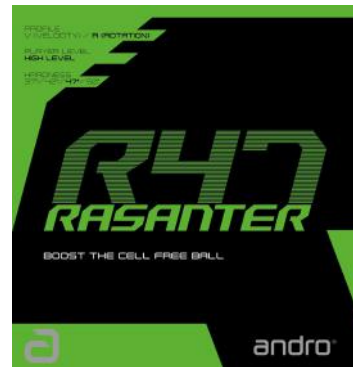

110.021.090 ●● | Thickness: 2,0 / Ultramax € 54,95

RASANTER R50

- Your game is spin oriented.
- As a high technical level player, you'll master the power of this extremely hard 50° sponge that will turbo charge your topspin game.
- Your full-throttle strokes will activate unprecedented spin performance at full speed.

110.021.089 ●● | Thickness: 2,0 / Ultramax € 54,95

RASANTER R47

- Your profile is spin driven. Offensive topspin play at higher speed is your strategy.
- As a high level player you will take full advantage of the 47° sponge hardness for extra power and speed in your topspin play.
- Be equipped to perform topspins with a precise curved trajectory and to be creative in the semidistance play as well.

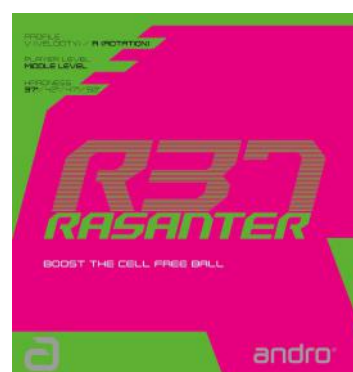

110.021.088 ●●● | Thickness: 1,7 / 2,0 / Ultramax € 54,95

RASANTER R42

- Your profile is spin driven. You are looking for maximum grip.
- As an advanced to high level player you will benefit from medium 42° sponge hardness taking full control on your spins.
- Your style is versatile and you combine the topspin potential of the surface rubber with a medium soft sponge guaranteeing best feedback and control.

110.021.087 ●●● | Thickness: 1,7 / 2,0 / Ultramax € 54,95

RASANTER R37

- Your profile is spin driven. Variable play from all distances is your formula for success.
- As a mid to advanced level player you prefer the soft 37° sponge allowing precise active topspin play and control.
- Spin is the key and you will be inspired by the extremely curved trajectory of your topspin even at moderate speed.

110.021.086 ●●● | Thickness: 1,7 / 2,0 / Ultramax € 54,95

PERFORMANCE RUBBERS

HEXER

SUPERNATURAL GRIP

HEXCELLENT

ANDRO HEXER GRIP SFX & HEXER POWERGRIP SFX

Rotation, precision, control - these are the convincing arguments of the HEXER family. The HEXER GRIP and POWERGRIP, as well as the two matching SFX versions, were developed to give you balanced spin attacks with high control and sound. It's always about getting the counter spin on the table. Let the others make the mistake. Equipped with a highly stretchy green sponge in the medium range, HEXER GRIP and POWERGRIP support a controlled forward spin game, while the associated SFX versions, with their soft sponges, provide forgive more imprecision in the point of impact.

HEXER GRIP SFX

- Spin, feeling, tolerance, control.
- Create magic spin: The advanced, on the plastic ball designed top sheet made of 100% natural rubber, allows maximum spin and magical trajectories.
- Experience maximum control: The soft high tech sponge of 40° achieves top rates in terms of control.
- Simple handling provided by excellent feeling: Ideal matching of sponge with small sized pores and the top sheet with maximised spin potential.
- For players focusing 100% in control.

110.021.094 ●●● | Thickness: 1,7 / 1,9 / 2,1

€ 49,95

HEXER POWERGRIP SFX

- Spin, feeling, consistency, control.
- Create magic spin: The advanced, on the plastic ball designed top sheet made of 100% natural rubber, allows maximum spin and magical trajectories.
- Experience amazing control: The sponge of 42,5° equipped with small sized pores provides a high failure tolerance and consistency in all shots.
- Superb comfort in play through excellent balance of all elements.
- For players with a variable style setting highest value on spin, control and stability in all their strokes.

110.021.095 ●●● | Thickness: 1,7 / 1,9 / 2,1

€ 49,95

HEXER POWERGRIP

- Spin, power, consistency, precision.
- Perform like hell: The 47,5 ° hard sponge with large pores creates catapult and power for a variety of spin and tempo strikes.
- Create magic spin: The advanced, on the plastic ball designed top sheet made of 100% natural rubber, allows maximum spin and magical trajectories.
- Constancy and precision through perfectly matched sponge and rubber components.
- Ideal to kick the plastic ball with more quality.
- For players who understand spin and precision as the ultimate basis for their modern topspin game.

Made in Germany

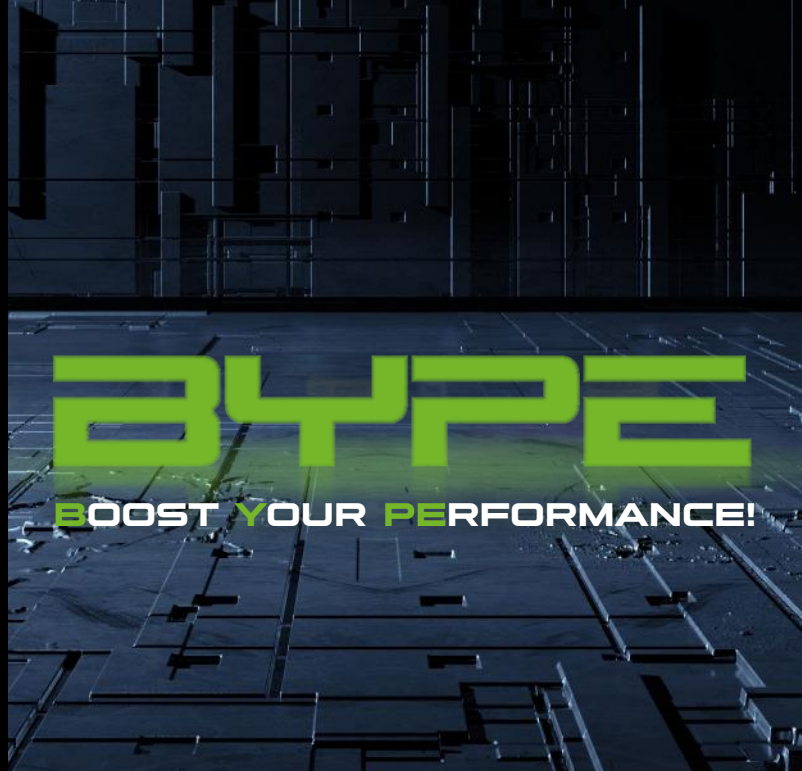

Extremely elastic sponge made of special caoutchouc guarantees more spin, precision and control.

TENSOR TECHNOLOGY

MADE IN GERMANY

Benefit from the 360° approach:

BYPE and the softer BYPE SFX will help you to improve your stroke control without sacrificing spin or speed.

On the contrary: this perfectly coordinated rubber composition is the boost for your game that you have been looking for so long. The balanced combination of grippy top sheet and TENSOR sponge supports the versatile and multi-faceted modern table tennis game.

Feel how your topspins gain spin and speed, while the comfortable, forgiving feedback of the TENSOR sponge supports you in reactive situations.

andro BYPE is the ideal intermediate stop on the way from the Essentials GTT to the performance legends of the HEXER series.

BYPE and BYPE SFX also have everything you need to support your game for years to come.

BYPE

- BYPE draws its energy from a 45° hard sponge with full TENSOR power.
- The clear and direct feedback at impact increases confidence in your own strokes and scores with easy handling.
- A spinny, modern top sheet enables variable and dangerous topspins as well as a wide range of spin shots.
- Boost Your PErformance! BYPE is the first choice for variable topspin players to upgrade their game with a 100% TENSOR.

110.021.104 ●● | Thickness: 1,8 / 2,0 / max

€ 43,95

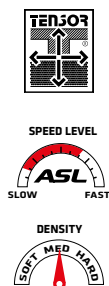

BYPE SFX

- As a 40° rubber with full TENSOR energy, BYPE SFX scores points with very high ball control and ease of play.
- The clear and direct feedback at the point of impact and the soft feel increase fault tolerance and control.
- The spinny top sheet enables variable and dangerous topspins as well as a wide range of spin shots.
- Boost Your PErformance! BYPE SFX is designed for a versatile game, performed by players with a desire for comfort and fun.

ADD COLOR TO YOUR PLAY

Important: the rules always require one side of the bat to be black. So you can swap red for one of the new colors for your racket update.

So, add some color to your game!

HEXER HD

- Excellent energy transfer due to innovative sponge structure!
- The natural rubber top-sheet extends the durability!
- More speed!
- More sharpness for your game: high definition microstructure for more precision and spin while you hit the ball!
- For players, who build up their game on spin, speed and precise offensive shots.

110.021.008 ●● | Thickness: 2,1

€ 49,95

HEXER

- Strong catapult-effect, extreme spin potential due to a rubber mixture of 100% natural rubber and a sponge of the 4th TENSOR-generation.
- The ball leaves your racket in a high aggressive arc through the extreme spin potential.
- The pimple arrangement (pimple geometry) gives you a powerful and compact feeling for your game.
- For the spin-oriented offensive player.

110.021.060 ●● | Thickness: 1,7 / 1,9 / 2,1

€ 49,95

HEXER PLUS

- The HEXER+ connects a sponge with the advanced HEXER-technology and a speed-focused top-sheet geometry.
- The pimple arrangement takes care of a flat and direct bounce which brings the ball to its target as fast as possible.
- You need less power to generate speed and spin. Time-saving!
- High dynamic, strong TENSOR-effect!
- For players, who have huge variety in their shots.

110.021.061 ●● | Thickness: 2,1

€ 49,95

HEXER POWERSPONGE

- Great sound with the very soft sponge of the 4th TENSOR-generation!
- The soft sponge very generously forgives deviations from the optimal ball impact point, which allows control to reach a tremendous level.
- The pimple geometry is specially designed to exploit the spin potential of the rubber, excellent ball feedback provides additional security.
- For players of all classes who don't want to sacrifice control for speed and rich sound.

110.021.068 ●● | Thickness: 1,7 / 1,9 / 2,1

€ 49,95

HEXER DURO

- Made for the players who want strong spin and speed values and also a long durability.
- The combination of a top-sheet of 100% natural rubber and a HEXER sponge (medium) gives you a huge choice of shots and make that rubber a great alternative for all players.
- The grippy top-sheet provides you with a longer contact time of rubber and ball. More control, less mistakes.
- Extreme long durability! Comfortable and economic.
- For players of all levels, who are searching for a constantly and long-lasting rubber.

110.021.067 ●●● | Thickness: 1,7 / 1,9 / 2,1

€ 44,95

BACKSIDE 3.0

- The slightly sticky surface enables precise and spin-rich shots.
- Perfect for defensive players: Offers maximum control, security and sensitivity.
- Versatile use: Ideal for all-round players and a variable game, both close to the table and from a distance.
- Adaptable: Available in sponge thicknesses of 1.2, 1.5 and 1.8 mm to suit different playing styles.
- Combines control, spin and versatility for a timeless playing experience.

110.021.108 ●● | Thickness: 1,2 / 1,5 / 1,8

€ 42,95

IMPULS POWERSPONGE

- Looking for the complete package of speed, spin and excellent ball-control? Then choose Impuls Powersponge! By ideal matching of these characteristics you get an easily controllable rubber that provides enormous tempo reserves.
- A very sticky surface combined with the soft, large-pored sponge of the newest TENSOR-technology, allow easily dirigible strokes and a high degree of control. Your goal to outmaneuver opponents will become child's play.
- The extreme TENSOR sound will give you additional feedback for a more precise ball

110.021.014 ●● | Thickness: 1,8 / 2,1

€ 48,95

IMPULS SPEED

- IMPULS SPEED The Impuls SPEED releases significantly more speed and spin than the successful Impuls rubber without losing control!
- Being the softest of all andro TENSOR BIOS rubbers so far, it is made of a harmonised rubber recipe that provides players of average and lower class levels with more controlled power during active strokes.
- The character of the Impuls SPEED combines two rubber types: the very soft sponge absorbs the opponents speed in the passive control play very well. In the active playing modus it enables to more energy. The strong sound and improved ball handling will impress every player immediately.
- Experience fewer mistakes due to the extra high flying curve and bigger ideal hitting area!
- The Impuls SPEED can be managed without effort also when practising less.

110.021.046 ●● | Thickness: 1,8 / 2,1

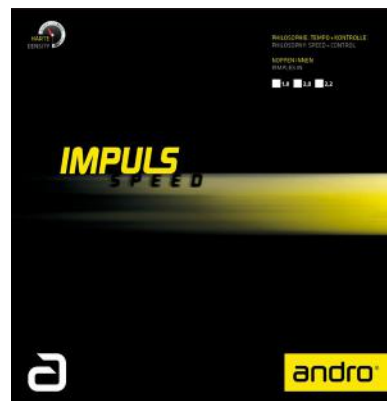

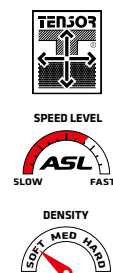

€ 42,95

SHIFTER

- A very hard, grippy top sheet and an always flexible medium sponge form the core of this classic rubber (without TENSOR effect).
- This combination makes it easy for you to control the ball with the andro Shifter.
- Specially developed for classic play based on controlled spin, blocking and counter-attacking.
- The 0/90 technology allows you to adjust the Shifter perfectly to your game: 0° for more speed, 90° for more spin and control.
- For the classic offensive player!

110.021.005 ●● | Thickness: 1,7 / 1,9 / 2,1

€ 42,95

**SUPREME LINE
BLADES**

**SYNTELIAC
SPEED WINS!**

**MADE
IN KOREA**

Simon Gauzy, WR #32 (06/2025)
plays the andro SYNTELIAC VCI

SYNTELIAC

Time - or reaction time - to be precise, is the all-important factor in winning points. The clearer and more unambiguous the feedback from the ball hit, the faster your reaction can be. These are exactly the vibration-reducing advantages of the new Synteliac's synthetic fibers. You will get the immediate feedback as to whether you have hit the ball correctly. Ergo, you are ready for the next shot faster.

The synthetic fibres ZYREEMA and VOLTEMA are among the most modern of their kind. ZYREEMA provides the blade a hard, crystal-clear feeling and huge speed reserves. VOLTEMA, on the other hand, provides moderate wood

hardness, incredible feeling and a great balance between speed and control. In combination with Carbon they set new standards in the SYNTELIAC series. The new andro SYNTELIAC technology intelligently combines the properties of synthetic fibres with the technical potential of state-of-the-art veneer processing. The special manufacturing process of the composite-wood-combination is done at lower temperatures than usual to fully preserve the properties of the wood veneers. The result: a new playing experience beyond previous carbon or synthetic woods. Optimize your reaction time with crystal-clear response feedback and efficient vibration suppression and experience the sensory, almost intuitive feel of the ball with a maximum sweet spot.

**SYNTELIAC
SPEED WINS!**

**MADE
IN KOREA**

SYNTELIAC VCI OFF

- With the Synteliac VCI, the synthetic fibre interlayer is located directly on the core veneer. The wooden veneers got more influence on the ball impact point. This makes the touch softer and even more sensitive.
- Due to the perceived longer ball contact time compared to the VCO, your shots gain precision and quality without losing danger.
- The Synteliac VCI adds safety to your passive game. Speed and ball control are well balanced. No feeling of oversteer.
- Players who base their offensive system on variable topspins and precise strokes will enjoy playing the Synteliac VCI.

100.021.031.001 straight | 100.021.031.002 flaired

€ 179,95

SYNTELIAC VCO OFF

- The synthetic fibre Voltema-Carbon is positioned under the outer veneer of the Synteliac VCO, which gives the blade more power and speed compared to the VCI version.
- The moderate hardness of the green Voltema-Carbon fibre supports a playing system based mainly on topspins, variable in hardness and rotation.
- First topspins on backspin are the speciality of the Synteliac VCO. The outer veneer of Koto and Voltema carbon exert pressure on the ball, while remaining veneers of Ayous and Kiri (core) provide the necessary feel for the ball.
- No other blade delivers such a great feeling when you hit the ball perfectly. This gives you confidence and security for your next shots.

100.021.030.001 straight | 100.021.030.002 flaired

€ 179,95

VOLTEMA

Made out of liquid crystal polymers, VOLTEMA gives the blade a moderate hardness and distinctive feel.

ZCO

ZCI

SYNTELIAC ZCO OFF/S

- Zyreema, twice as tear-resistant as the standard synthetic fibre aramid, gives the Synteliac ZCO immense power and dynamics as well as a crystal-clear sound.
- It feels like Zyreema carbon widens the ideal hitting window (timing) to give the ball the maximum speed and rotation.
- The impressively large sweet spot gives you additional ball safety and feel for the ball.
- The Synteliac ZCO opens up new spheres of speed, spin and variability in your game. Your game will see an immense increase in quality.

100.021.032.001 straight | 100.021.032.002 flaired

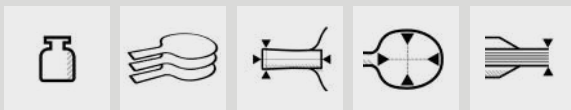

€ 199,95

SYNTELIAC ZCI OFF

- The Synteliac ZCI lives from its enormous dynamics. The uniquely large sweet-spot, the clear feeling and the hardness of the Zyreema material are in perfect balance with each other.
- The high-tech synthetic fibre Zyreema is supported by two layers of wood around the core veneer until it reaches the ball's point of impact.
- The crystal clear Zyreema feel remains but benefits from optimized control values and a slight tempo reduction due to the inner construction.
- The impressively large sweetspot gives you additional consistency and feel for the ball.

**TP_LIGNA
MADE IN GERMANY**

OUR FINEST INSTRUMENTS

TP_LIGNA stands for premium, from A to Z, and is the ultimate investment in your game quality. The ergonomic 3D shape of the concave handles made from the finest woods allows hand and racket to merge into one unit. Comparable sawn veneers in manufactory quality you will find only in violin making. A TP_LIGNA is not only a blade, it is a fine instrument, truly Made in Germany.

BRANDNEW

BRANDNEW

TP_LIGNA BASALT INNER OFF

- Basalt fibres around the core veneer provide a perfect combination of speed, feel and control.
- More elastic than carbon blades, for a harmonious feel with long ball contact time.
- Soft, sensitive ball impact with clear feedback and reduced vibration effect. Enlarged sweetspot enables precise placement and high control.
- Medium speed - ideal for offensive players looking for dynamics without losing control.

100.021.044.001 straight | 100.021.044.002 flaired

€ 169,95

TP_LIGNA DEF

- The first defensive blade in the TP_Ligna series impresses with its outstanding control, thanks to perfectly matched Limba (outer veneer) and Kiri plywood in terms of thickness and quality.
- The enlarged blade provides additional feel for the ball and conveys confidence from all distances to the table.
- However, the TP_Ligna product design makes the difference: the natural wood handle allows the racket to become one with the hand. There is nothing better for a defensive player.
- Available in the straight and concave grip shapes favoured by defensive players.

HIGH LINE BLADES

TREIBER

DRIVEN BY TECHNOLOGY

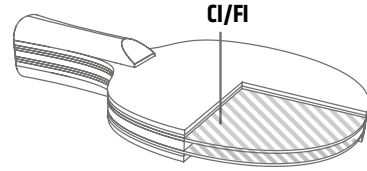

CARBON OUTER CO

Blades with carbon fiber layer directly under the outer veneer for powerful play with hard stop.

FIBER OUTER FO

Wood with synthetic fiber layer directly under the outer veneer for great rigidity and high speed.

CARBON INNER CI

The carbon layer is wrapped around the core veneer, allowing a softer touch while maintaining high stiffness.

FIBER INNER FI

The synthetic fiber layer is placed around the core veneer, the sweetspot is enlarged.

TREIBER

If you want to keep up with modern table tennis, you can no longer do without a synthetic fiber-reinforced racket wood. The immediate transmission of the impulse to the hitting hand, the direct transfer of the hitting energy to the ball as well as the broad and upward open speed range make this type of blade indispensable in modern times. andro TREIBER opens up all these advantages and also offers the possibility to play the respective model either in the inner or outer version. For all woods with synthetic fiber content, this technology is already indicated by **CO/FO** or **CI/FI** in the product name:

TREIBER FO OFF/S

- TXL Fiber directly under the Hinoki outer veneer offers you advantages with its directness at first balls on downspin as well as in topspin rallies.
- The incomparably high ball throw caused by the Hinoki outer veneer is fun and means additional danger to your opponent.

100.021.012.001 straight | 100.021.012.002 flaired |

TECHNOLOGY

MATERIAL MIX

Extremely comfortable wearing comfort is generated by combining different materials. Humidity is transported away from the body and the skin remains pleasantly dry.

BREATHABLE

Moisture is quickly and effectively transported from the skin to the outer tissue by an innovative multi-channel structure. Thus sweat evaporates more quickly for highest level of freshness and therefore sustains the performance of the player.

SUBLIMATION TECHNOLOGY

Elaborate print processing requiring highly functional machinery for consistently brilliant and fligree design and colour results.

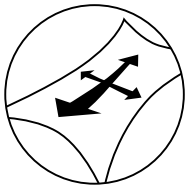

SHAPE-RETAINING

Our aim: Fine feel and comfort for the long-term. andro sportswear's upmarket high-tech fibers retain its shape even after a variety of washes and intensive use.

OEKO-TEX® STANDARD 100

andro twisted terry towels are conform to the Oeko-Tex®-Standard 100, an independent testing and certification system, which underlies extensive testing for harmful substances and whose requirements go far beyond existing national regulations.

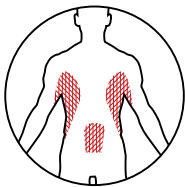

STRETCHY

Our functional fibers are very elastic and stretchy. This feature supports the natural range of motion and allows you to quickly react to each situation without being impaired.

TESTED FOR HARMFUL SUBSTANCES

Not only the functionality of the textiles is groundbreaking, but also their claim of environmental compatibility. Therefore andro only processes skin-friendly fabrics that are tested for harmful substances.

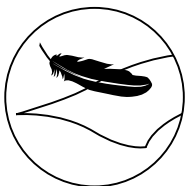

BODYMAPPING

Our fabrics have been specially designed for table tennis to optimally support the athlete's natural motions.

SAMPLE PACKAGES / SIZE SETS

A useful and free service as a good basis for the decision making in terms of choosing the right outfit for your team or even your club. Our sales consultants and partners can add some helpful input - promised.

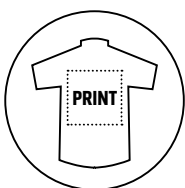

SUPERLIGHT

Our functional fibers are not only selected in terms of functionality, but also in terms of weight and comfort. The result are lightweight breathable fibers with a very pleasant surface feel.

SIZES

Whether mini, senior or lady - andro provides the perfect size range for its tt-specific sportswear. Special kid's sizes and women specific styles are a matter of course. Special labeling for clear and fast attribution.

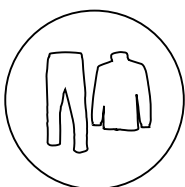

IDEALLY PRINTABLE

The majority of andro textiles are designed with a plain back - generous print and flock area for club or sponsor representation.

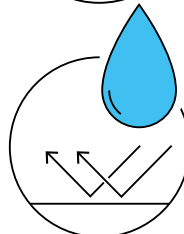

GUARANTEED AVAILABILITY

andro provides guaranteed availability for clothing parts since many years - thus perfect and uniform equipment is guaranteed for several years. All new andro textiles with guaranteed availability are deliverable from spring 2025.

FREELY COMBINABLE

Favored tracksuit in differing sizes for jacket and pants? No problem at andro. Get your favored combination without extra charge.

WATER-REPELLENT

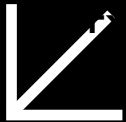

The water-repellent material offers reliable protection against moisture, wind and cold - ideal for changeable weather.

BEAT GRAVITY

Material reinforcement for **maximum stability**.

CROSS STEP PRO

- Evolution of the andro Cross Step, developed in collaboration with the andro Pro Team.
- The newly shaped heel area encloses the foot and provides maximum support.
- Material reinforcement on the front outer area supports the shoe where the greatest force is exerted.
- The proven TPU+ insert on the midfoot stabilizes and prevents twisting in this area.
- Strong functionality accompanied by an elegant, sporty design.

Sizes: UK 3,5 - 12 | EUR 36 - 47

Ergonomic heel area for **optimized support**.

FOOTWEAR FOR ALL NEEDS IN TABLE TENNIS

Table tennis is probably the fastest sport on earth. The ball crosses the net with up to 180 km/h. You hardly have time to react properly. That is why you have to be fast. You must not lose any time. You need a firm grip, comfortable and lightweight footwear that can withstand all the stress.

STRUKTUR-PROFIL

Tiny structures on the surface of the profile guarantee extreme grip.

TPU+

Core made of TPU+ material supports the mid foot area.

AVW
Air Ventilation Window (AVW) for optimal ventilation.

3D SOLE
3D Sole cushions and enables fast, ground-level motion sequences.

i Improved, anatomically shaped, removable insole!

350.021.018
CROSS STEP 2 white / black / green

350.021.016
CROSS STEP 2 black/neon red

CROSS STEP II

- Comfortable, soft upper material with mesh inserts for optimal ventilation and moisture transport.
- Stabilization of the midfoot area through the TPU+ core is particularly appreciated by top players. Stabilization combined with the best possible freedom of movement.
- The 3D sole cushions in the middle and rear area and at the same time supports fast steps in all directions in the forefoot area.
- Anatomically shaped, removable insole.
- Stability and effectiveness meet a cool design.

PERFORMANCE BALLS

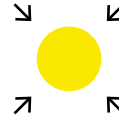

ZERO TOLERANCE

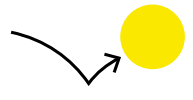

With the ZeroT*** andro takes into account the high demands of top players on table tennis balls: only if the ball leaves the table and the racket in a constant and predictable way, you can achieve top performance in competition. To achieve these characteristics, nothing is left to chance with the ZeroT***. Produced with ABS material, only the hardest specimens find their way into the ball packaging. Beforehand, each ball undergoes a final quality control, during which the exact roundness, hardness and bounce are also precisely tested. Only a strictly limited number of balls finally make it through these demanding quality checks.

EXACT ROUNDNESS

ROBUST HARDNESS

UNIFORM BOUNCE BEHAVIOR

DANNY HEISTER

– andro Brand Ambassador

*“The andro ZeroT*** is a world-class ball, just as the top players want it: round, hard and with absolutely constant bounce.”*

ZERO T***

The andro ZeroT*** is a ABS-Ball of the newest generation. The high rigidity of the material guarantees a constant trajectory, whilst the optimised production-processes, which focuses on the seem, makes the ball perfectly round. The ZeroT*** was tested thoroughly to make sure it brings joy to your game. Consistency, predictability, durability and a great balance between speed- and spin-development are the trademarks of this ball.

BUZZER

The new andro Buzzer series is the first consequent system bat generation from andro. For the first time, a complete system of buzzer blade and buzzer rubber was developed as a unit and perfectly matched to each other. The result is a highly efficient product.

Or in other words: Technology at an unbeatable price-performance ratio. Within the simply structured Buzzer series, hobby and junior players from the club or street scene can technically upgrade themselves from the entry level to the demanding top level according to their progress.

BUZZER PRO CARBON 500 RX

DIE TOTEN HOSEN

RAPIDO 3000

The first punk rock table tennis racket: a collaboration between andro and DIE TOTEN HOSEN. The band plays table tennis when they are on tour - a game of table tennis circuit before gigs is almost part of the ritual. The RAPIDO 3000 - a must for HOSEN and table tennis fans. While stocks last.

With this racket you can play in the club as well as in the park or hobby room: Ideal table tennis racket for beginners and for learning basic techniques with a high level of ball control. The blade consists of five layers, which allows for slight vibrations. This effect increases the feeling for the ball and enables rotation and topspin strokes. The red and black andro rubbers have a thickness of approx. 1.8 mm and are ITTF-approved. They offer a high degree of control and are designed for spin.

RACKETS

BYPE

UTY-400

The UTY 400 racket is designed to be one step more offensive than the UTY 300. The Unity 5 OFF blade offers a higher basic speed, while the BYPE and BYPE SFX rubbers in 2.0 mm have enough substance to enable a variable offensive game. ITTF and therefore approved for competitions. andro blade Unity 5 OFF - concave with andro Bype 2.0 mm and Bype SFX 2.0 mm rubbers

120.021.220 ●○ flaired

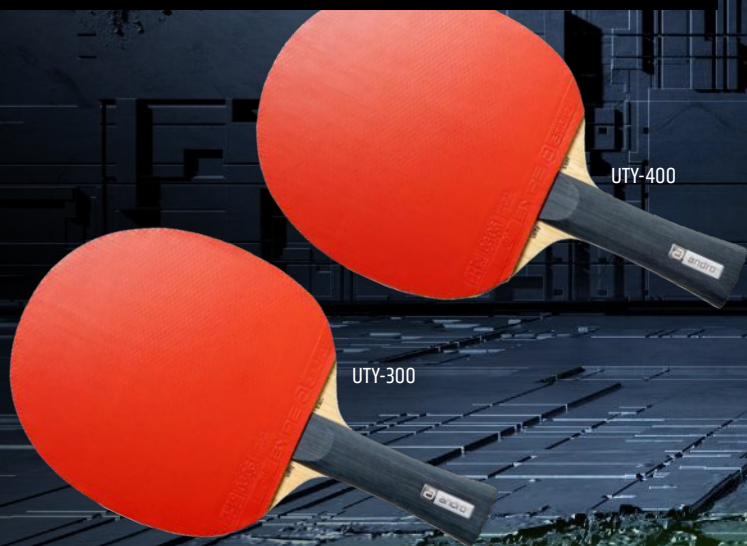

€ 130,85

UTY-300

Ambitious players can rely on this combination: the Unity 5 ALL blade supports all hitting techniques thanks to its easy handling and offers excellent control. The BYPE and BYPE SFX rubbers in 1.8 mm contain the full TENSOR effect, which means a plus in feel, speed and spin. ITTF and therefore approved for competitions. andro blade Unity 5 ALL - concave with rubbers andro Bype 1.8 mm and Bype SFX 1.8 mm

THE ANDRO SHOW COURT

andro is a table supplier to many clubs, associations and events. For example, the WTT Feeder Tournaments 2024 in Düsseldorf took place on andro Magnum SC tables and the new andro Show Court. TTBL clubs such as TSV Bad Königshofen or BV Borussia 09 Dortmund give their match courts a certain something extra by using an andro Show Court.

The andro Show Court was developed to create an exclusive and high-quality competition atmosphere for matches at the very highest level. The Show Court helps the spectator to visually classify the distances in the playing box, as it provides a background against which the ball and athletes can be followed in the best possible way under any conditions. As an advertising space, no other object is as eye-catching as the Show Court.

OFFICIAL SUPPLIER

THE TOPSELLER

Why play on a Magnum SC?

Time and again you see dissatisfied players in table tennis halls. They often complain about the uneven bounce of their table. But what many don't know is that the problem is almost always on the floor. Measurements in many halls have shown that on a table surface of 4.1 square meters, the sprung floor often has a height difference of up to 2.5 cm.

This problem is easily solved by the Magnum SC. With the Magnum SC, the height differences in the hall floor can be compensated with a readjustment on the table leg. Only then do all 4 feet stand evenly firm on the floor and guarantee a perfect ball rebound at all points.

andro LONG-TERM WARRANTY:

On all andro tables you get an extended warranty of 3 years.

Smart Manual System:

Safety interlock minimizes the risk of accidents during set-up and take-down!

MAGNUM SC

- High-end competition table with 25mm thick playing surface.
- ITTF approved, complies with European Standard 14468-1. Class A
- gas spring elements allow folding and unfolding almost without effort
